[18]	Gruppo batteria, mod.		BT 520 Li 48 BT 540 Li 48 BT 550 Li 48
[19]	Carica batteria		CG 500 Li 48 CGF 500 Li 48 CGD 500 Li 48

a) NOTA: il valore totale dichiarato delle vibrazioni è stato misurato attenendosi ad un metodo normalizzato di prova e può essere utilizzato per fare un paragone tra un utensile e l'altro. Il valore totale delle vibrazioni può essere utilizzato anche in una valutazione preliminare dell'esposizione.

b) AVVERTENZA: l'emissione di vibrazioni nell'uso effettivo dell'utensile può essere diversa dal valore totale dichiarato a seconda dei modi in cui si utilizza l'utensile. Pertanto è necessario, durante il lavoro, adottare le seguenti misure di sicurezza volte a proteggere l'operatore: indossare guanti durante l'uso, limitare i tempi d'utilizzo della macchina e accorciare i tempi in cui si tene premuta la leva comando acceleratore.

<p>[1] BG - ТЕХНИЧЕСКИ ДАННИ</p> <p>[2] Напрежение и честота на захранване MAX [3] Напрежение и честота на захранване NOMINAL</p> <p>[4] Скорост без товар [5] Максимална въздушна скорост [6] Въздушен дебит [7] Размери [8] Дължина [9] Височина [10] Широчина [11] Тегло без акумулаторния блок [12] Ниво на звуково налягане (съгласно EN 50636-2-100) [13] Несигурност на измерване [14] Измерено ниво на акустична мощност (съгласно EN 50636-2-100) [15] Гарантирано ниво на акустична мощност (съгласно EN 2000/14/EC) [16] Ниво на вибрации (съгласно EN 50636-2-100) [17] Припаднености по поръчка [18] Акумулаторен блок [19] Зарядно устройство за акумулатора</p> <p>a) ЗАБЕЛЕЖКА: декларираната обща стойност на вибрации е измерена при дръжки се към стандартизиран метод на изпитване и може да се използва за сравнение между един и друг инструмент. Общата стойност на вибрации може да се използва и за предварителна оценка на излагането.</p> <p>b) ПРЕДУПРЕЖДЕНИЕ: издаденото на вибрации при реалното използване на инструмента може да бъде различна от общата декларирана стойност, в зависимост от начините на използване на инструмента. Поради това е необходимо по време на работата да се вземат следните предпазни мерки целици предпазването на оператора: носете ръкавици по време на използването, ограничите времената на използване на машината и намалете времената, през които се държи натиснат лоста за управление на ускорителя.</p>	<p>[1] BS - TEHNIČKI PODACI</p> <p>[2] Napon i frekvencija napajanja MAX [3] Napon i frekvencija napajanja NOMINAL</p> <p>[4] Brzina bez opterećenja [5] Maksimalna brzina vazduha [6] Protok vazduha [7] Dimenzije [8] Dužina [9] Visina [10] Sirina [11] Težina bez baterije [12] Razina zvučnog pritiska (na osnovu standarda EN 50636-2-100) [13] Mjerna nesigurnost [14] Izmjerenja razina zvucne snage (na osnovu standarda EN 50636-2-100) [15] Garantovana razina zvucne snage (na osnovu standarda 2000/14/EC) [16] Razina vibracija (na osnovu standarda EN 50636-2-100) [17] Dodatna oprema na zahtjev [18] Baterija [19] Punjač baterije</p> <p>a) NAPOMENA: ukupna prijavljena vrijednost vibracija izmjerena je prema normalizovanim metodama ispitivanja i može se koristiti za vršenje poređenja između dvije alatke. Ukupna vrijednost vibracija može se koristiti u prilikom prethodne procjene izloženoštij.</p> <p>b) UPOZORENJE: emisija vibracija prilikom stvarne upotrebe alatke može se razlikovati od ukupne prijavljene vrijednosti u zavisnosti od načina na koji se koristi alatka. Čin je neophodno, da vrijeme rada, primjeniti slijedeće sigurnosne mjere za zaštitu radnika: koristiti rukavice za vrijeme upotrebe, ograničiti vrijeme upotrebe mašine i skratiti vrijeme za koje se drži pritisnutu polugu komande gasa.</p>	<p>[1] CS - TECHNICKÉ PARAMETRY</p> <p>[2] Napájecí napětí a frekvence MAX [3] Napájecí napětí a frekvence NOMINAL</p> <p>[4] Rychlosť bez nákladu [5] Maximálni rychlosť vzduchu [6] Prútok vzduchu [7] Rozmery</p> <p>[8] Délka</p> <p>[9] Výška</p> <p>[10] Šířka</p> <p>[11] Hmotnost bez akumulátoru</p> <p>[12] Úroveň akustického tlaku (dle EN 50636-2-100)</p> <p>[13] Nepřesnost měření</p> <p>[14] Úroveň naměřeného akustického výkonu (dle EN 50636-2-100)</p> <p>[15] Úroveň zaručeného akustického výkonu (dle 2000/14/EC)</p> <p>[16] Úroveň vibraci (dle EN 50636-2-100)</p> <p>[17] Příslušenství na požadání</p> <p>[18] Akumulátor</p> <p>[19] Nabíječka akumulátoru</p> <p>a) POZNÁMKA: prohlášená celková hodnota vibrací byla naměřena s použitím normalizované zkoušební metody a lze ji použít pro srovnání jednotlivých nástrojů. Celková hodnota vibrací může být použita také při přípravném vyhodnocování vystavení vibracím.</p> <p>b) VAROVÁNÍ: emise vibrací při skutečnému používání nástroje může být odlišná od prohlášené celkové hodnoty, v závislosti na režimech, ve kterých se daný nástroj používá. Proto je třeba během práce přijmout níže uvedená bezpečnostní opatření, jejichž cílem je ochránit operátora: během běžného používání mějte nasazené rukavice a omezte dobu používání stroje a zkrátte dobу, během kterých je zatlacená ovládací páka plynu.</p>
<p>[1] DA - TEKNISKE DATA</p> <p>[2] Forsningsspænding og -frekvens MAX [3] Forsningsspænding og -frekvens NOMINAL</p> <p>[4] Hastighed uden belastning [5] Maksimal luft hastighed [6] Luftstrøm [7] Mål [8] Længde [9] Højde [10] Bredde [11] Vægt uden batterigruppe [12] Lydtrykniveau (i henhold til EN 50636-2-100) [13] Måleusikkerhed [14] Målt lydefektniveau (i henhold til EN 50636-2-100) [15] Garanteret lydefektniveau (i henhold til 2000/14/EC) [16] Vibrationsniveau (i henhold til EN 50636-2-100) [17] Ekstraudstry [18] Batterigruppe [19] Batteriplader</p> <p>a) BEMÆRK: den samlede erklærede værdi af vibrationer blev målt ifølge en standardiseret metode til afprøvning og kan bruges til at foretage en sammenligning mellem forskellige redskaber. Den samlede værdi af vibrationer kan også bruges til en indledende vurdering af eksponeringen.</p> <p>b) ADVARSEL: den faktiske udsendelse af vibrationer i forbindelse med brug af redskabet kan afvige fra den samlede attesterede værdi afhængigt af den konkrete brug af redskabet. Derfor er det nødvendigt, at man under arbejdet tager følgende sikkerhedsanbefalinger for at beskytte brugerne. Bær handske under brug, begrens den tid maskinen bruges og forkort den tid hvor gashåndtaget holdes aktiveret</p>	<p>[1] DE - TECHNISCHE DATEN</p> <p>[2] Versorgungsspannung und -frequenz MAX [3] Versorgungsspannung und -frequenz NOMINAL</p> <p>[4] Leerauflaufgeschwindigkeit [5] Max. Luftgeschwindigkeit [6] Luftstrom [7] Abmessungen [8] Länge [9] Höhe [10] Breite [11] Gewicht ohne Akku [12] Schalldruckpegel (gemäß EN 50636-2-100) [13] Messgenauigkeit [14] Gemessener Schallleistungspegel (gemäß EN 50636-2-100) [15] Garantiert Schallleistungspegel (gemäß 2000/14/EC) [16] Vibrationspegel (gemäß EN 50636-2-100) [17] Sonderzubehör [18] Akku [19] Batterieladegerät</p> <p>a) HINWEIS: Der erklärte Gesamtwert der Vibrationen wurde durch eine standardisierte Methode gemessen. Er kann verwendet werden, um einen Vergleich zwischen verschiedenen Werkzeugen anzustellen. Der Gesamtwert der Vibrationen kann auch bei einer Vorabwertsicherung der Vibrationsbelastung eingesetzt werden.</p> <p>b) WARUNG: Die Schwingungsemission bei der effektiven Verwendung des Werkzeugs kann sich je nach den Einsatzarten des Werkzeugs vom erklärten Gesamtwert unterscheiden. Deshalb ist es notwendig, während der Arbeit die folgenden Sicherheitsmaßnahmen zu ergreifen, um den Bediener zu schützen: Handschuhe anziehen, die Nutzungsdauer einzuschränken und die Zeiten der Maschine begrenzen und die Zeiten verkürzen, in denen man den Steuerhebel gedrückt hält.</p>	<p>[1] EL - TEXNIKA XAPAKTHRIΣTIKA</p> <p>[2] Τάση και συχνότητα τροφοδοσίας MAX [3] Τάση και συχνότητα τροφοδοσίας NOMINAL</p> <p>[4] Ταχύτητα χωρίς φορτίο [5] Μέγιστη ταχύτητα αέρα [6] Ροή αέρα [7] Διαστάσεις</p> <p>[8] Μήκος</p> <p>[9] Ύψος</p> <p>[10] Πλάτος</p> <p>[11] Βάρος γκρουπτ μπαταρίας</p> <p>[12] Στάθμη ακουστικής πίεσης (με βάση το πρότυπο EN 50636-2-100)</p> <p>[13] Αβεβαιότητα μέτρησης</p> <p>[14] Μετρημένη στάθμη ακουστικής ισχύος (με βάση το πρότυπο EN 50636-2-100)</p> <p>[15] Εγγυημένη στάθμη ακουστικής ισχύος (με βάση το πρότυπο 2000/14/EC)</p> <p>[16] Επιπέδω κραδασμών (με βάση το πρότυπο EN 50636-2-100)</p> <p>[17] Αιτουμένα παρέλκομενα</p> <p>[18] Γκρουπτ μπαταρίας</p> <p>[19] Φορτιστής μπαταρίας</p> <p>a) ΣΗΜΕΙΩΣΗ: η συνολική δηλωμένη τιμή των κραδασμών έχει μετρηθεί με βάση μια πρότυπη μέθοδο δοκιμής και μπορεί να χρησιμοποιηθεί για τη σύγκριση διαφόρων εργαλείων. Η συνολική τιμή των κραδασμών μπορεί επίσης να χρησιμοποιηθεί για μια προκαταρκτική εκτίμηση της έκθεσης.</p> <p>b) ΠΡΟΕΙΔΟΠΟΙΗΣΗ: η εκπομπή κραδασμών κατά την πραγματική χρήση του εργαλείου μπορεί να είναι διαφορετική από τη συνολική δηλωμένη τιμή ανάλογα με τον τρόπο χρήσης του εργαλείου. Επομένως είναι απαραίτητο, κατά την εργασία, να λάβετε τα παρακάτω μέτρα ασφαλείας για την προστασία του χρήστη: φορέστε γάντια κατά τη χρήση, περιορίστε το χρόνο χρήσης του μηχανήματος και μειώστε το χρόνο χρήσης του μοχλού γκραζιού.</p>

<p>[1] EN - TECHNICAL DATA</p> <p>[2] Power supply frequency and voltage MAX [3] Power supply frequency and voltage NOMINAL</p> <p>[4] No load speed [5] Maximum air speed [6] Flow of Air [7] Dimensions [8] Length [9] Height [10] Width [11] Weight without battery pack [12] Measured sound pressure level (according to EN 50636-2-100) [13] Uncertainty of measure [14] Measured sound power level (according to EN 50636-2-100) [15] Guaranteed sound power level (according to 2000/14/EC) [16] Vibration level (according to EN 50636-2-100) [17] Accessories available on request [18] Battery pack [19] Battery charger</p> <p>a) NOTE: the declared total vibration value was measured using a normalised test method and can be used to conduct comparisons between one tool and another. The total vibration value can also be used for a preliminary exposure evaluation.</p> <p>b) WARNING: the vibrations emitted during actual use of the tool can differ from the declared total value according to how the tool is used. Whilst working, therefore, it is necessary to adopt the following safety measures designed to protect the operator: wear protective gloves whilst working, use the machine for limited periods at a time and decrease the time during which the throttle control lever is pressed.</p>	<p>[1] ES - DATOS TÉCNICOS</p> <p>[2] Tensión y Frecuencia de alimentación MAX [3] Tensión y Frecuencia de alimentación NOMINAL</p> <p>[4] Velocidad sin carga [5] Velocidad máxima del aire [6] Flujo de aire [7] Dimensiones [8] Longitud [9] Altura [10] Ancho [11] Peso sin grupo de batería [12] Nivel de presión acústica (según EN 50636-2-100) [13] Incertidumbre de medida [14] Nivel de potencia acústica medida (según EN 50636-2-100) [15] Nivel de potencia acústica garantizado (según 2000/14/EC) [16] Nivel de vibraciones (según EN 50636-2-100) [17] Accesorios bajo pedido [18] Grupo de batería [19] Cargador de batería</p> <p>a) NOTA: el valor total de la vibración se ha medido según un método normalizado de prueba y puede utilizarse para comparar uno u otro aparato. El valor total de la vibración también se puede emplear para la valoración preliminar de la exposición.</p> <p>b) ADVERTENCIA: la emisión de vibración en el uso efectivo del aparato puede ser diferente al valor total dependiendo de cómo se utiliza el mismo. Por ello, durante la actividad se deben poner en práctica las siguientes medidas de seguridad para el usuario: usar guantes, limitar el tiempo de uso de la máquina, así como el tiempo que se mantiene presionada la palanca de mando del acelerador.</p>	<p>[1] ET - TEHNILISED ANDMED</p> <p>[2] Toite pingi ja sageodus MAX [3] Toite pingi ja sageodus NOMINAL [4] Kiirus ilma koormusteta [5] Ohu maksimaalne kiirus [6] Ohuvool [7] Mõõtmned [8] Pikkus [9] Kõrgus [10] Laius [11] Kaal ilma akutaka [12] Helirõhu tase (vastavalt EN 50636-2-100) [13] Mõõdetud müravõimsuse tase (vastavalt EN 50636-2-100) [14] Garanteeritud müravõimsuse tase (vastavalt 2000/14/EC) [15] Vibratsiooni tase (vastavalt EN 50636-2-100) [16] Tellimusel lisatarvikud [17] Aku [18] Akulaadija</p> <p>a) MÄRKUS: deklareeritud koguvibratsiooni tase mõõdeti standardiseeritud testi käigus, mille abil on võimalik võrrelda omavahel erinevate tööriistade vibratsiooni. Deklareeritud koguvibratsiooni vääb kasutada ka eeldatava vibratsiooni käes olemise hindamiseks.</p> <p>b) HOIATUS: tegelikud tööriista kasutamisel tekivad vibratsioonid võivad erineda deklareeritud koguvibratsiooni tasemest sõltuvalt tööriista kasutamise viisist. Seepärast tuleb töö ajal kasutusele võtta ohutusmeetmed, millega tõotajat kaitsta: kandke kasutamise ajal kindaid, piirake masina kasutamise aega ja lühendage perioode, mille vältel hoitakse gaasihooaba all.</p>
<p>[1] FI - TEKNISET TIEDOT</p> <p>[2] Syöttöjännite ja -taajuus MAX [3] Syöttöjännite ja -taajuus NOMINAL [4] Nopeus ilman kuormaa [5] Ilman maksiminopeus [6] Ilmavirta [7] Koko [8] Pititus [9] Korkeus [10] Leveys [11] Paino ilman akkuyksikköä [12] Akustisen paineen taso (EN 50636-2-100:n mukaisesti) [13] Mittauksen epävarmuus [14] Mitattu aänitehotaso EN 50636-2-100:n mukaisesti) [15] Taatu aänitehotaso (2000/14/EC:n mukaisesti) [16] Tärinätaso (EN 50636-2-100:n mukaisesti) [17] Tilattavat lisävarusteet [18] Akkuyksikkö [19] Akkulaturi</p> <p>a) HUOMAUTUS: tärinän kokonaisarvo on mitattu käytävällä normalisoituun testiminenetelmään ja sitä voidaan käyttää verrattaessa työkaluja keskenään. Tärinän kokonaisarvoa voidaan käyttää myös kun tehdään altimistusta koskeva esiarviointti.</p> <p>b) VAROITUS: laitteen tuottama tärinä työvälaineen todellisen käytön aikana saattaa poiketa ilmoitetusta kokonaisarvosta käytötävasta riippuen. Tämän vuoksi on tarpeen soveltaa seuraavia käytäjiää suojaavia turvatoimenpiteitä: käytää käsineitä käytön aikana, rajoittaa laitteen käyttöäkaika ja lyhentää aikoa jolloin kaasuttimen vipua pidetään painettuna.</p>	<p>[1] FR - CARACTÉRISTIQUES TECHNIQUES</p> <p>[2] Tension et fréquence d'alimentation MAX [3] Tension et fréquence d'alimentation* NOMINAL</p> <p>[4] Vitesse à vide [5] Vitesse maximum de l'air [6] Flux d'air [7] Dimensions [8] Longueur [9] Hauteur [10] Largeur [11] Poids sans groupe batterie [12] Niveau de pression acoustique (selon la norme EN 50636-2-100) [13] Incertitude de la mesure [14] Niveau de puissance acoustique mesuré (selon la norme EN 50636-2-100) [15] Niveau de puissance acoustique garanti (selon la norme 2000/14/EC) [16] Niveau de vibrations (selon la norme EN 50636-2-100) [17] Accessoires sur demande [18] Groupe batterie [19] Chargeur de batterie</p> <p>a) REMARQUE: la valeur totale déclarée des vibrations a été mesurée selon une méthode d'essai normalisée et peut être utilisée pour comparer un outillage avec un autre. La valeur totale des vibrations peut être utilisée aussi pour une évaluation préalable à l'exposition.</p> <p>b) AVERTISSEMENT: L'émission des vibrations à usage effectif de l'outilage peut être différent de la valeur totale déclarée selon les modes d'utilisation de l'outillage. Par conséquent, il est nécessaire, pendant le travail, d'adopter les mesures de sécurité suivantes en vue de protéger l'opérateur: porter des gants durant l'utilisation, limiter les temps d'utilisation de la machine et écouter les temps pendant lesquels le levier de commande de l'accélérateur est enfoncé.</p>	<p>[1] HR - TEHNIČKI PODACI</p> <p>[2] Napon i frekvencija napajanja MAX [3] Napon i frekvencija napajanja NOMINAL [4] Brzina bez opterećenja [5] Maksimalna brzina zraka [6] Protok zraka [7] Dimentzije [8] Dužina [9] Visina [10] Sirina [11] Težina bez baterije [12] Razina zvučnog tlaka (na osnovu standarta EN 50636-2-100) [13] Mjerna nesigurnost [14] Izmjerenja razina zvučne snage (na osnovu standarta EN 50636-2-100) [15] Zajamčena razina zvučne snage (na osnovu standarta 2000/14/EC) [16] Razina vibracija (na osnovu standarta EN 50636-2-100) [17] Dodatni pribor na upit [18] Baterija [19] Razina zvučnog tlaka</p> <p>a) NAPOMENA: izjavljena ukupna vrijednost vibracija izmjerenja je pridržavajući se normirane probne metode i može se koristiti za usporedbu jednog alata s drugim. Ukupnu vrijednost vibracija može se koristiti i u preliminarnoj procjeni izloženosti.</p> <p>b) UPOZORENJE: emisija vibracija pri stvarnoj uporabi alata može se razlikovati od izjavljene ukupne vrijednosti, ovisno o načinu korištenja alata. Stoga je za vrijeme rada potrebno poduzeti slijedeće sigurnosne mjeru namijenjene zaštiti rukovatelja: nositi rukavice tijekom uporabe, ograniciti vrijeme korištenja stroja te skratiti vrijeme držanja pritisnute upravljačke ručice gasa.</p>

<p>[1] HU - MŰSZAKI ADATOK</p> <p>[2] Tápfeszültség és frekvencia MAX [3] Tápfeszültség és -frekvencia NOMINAL</p> <p>[4] Sebesség terhelés nélkül [5] Levegő max. sebessége [6] Léágárm [7] Méretek [8] Hossz [9] Magasság [10] Szélesség [11] Tömeg akkumulátor egység nélkül [12] Hangnyomászint (EN 50636-2-100 szabvány alapján) [13] Mérés bizonytalanság [14] Mérő zajteljesítmény szint (EN 50636-2-100 szabvány alapján) [15] Garantált zajteljesítmény szint (2000/14/EC szabvány alapján) [16] Vibrációszt (EN 50636-2-100 szabvány alapján) [17] Rendelhető fartoncok [18] Akkumulátor egység [19] Akkumulátor-tölto</p> <p>a) MEGJEGYZÉS: a rezgés névleges összértékét szabványos teszt módszerrel mérítik, ezért alkalmazható más szerszámokkal való összehasonlításra. A rezgés névleges összértéke a kitettség elözetes értékelésére is alkalmas.</p> <p>b) FIGYELMEZTETÉS: a szerszám valós használata során keletkező rezgés eltérhet a névleges összértéktől a szerszám használati módjának függvényében. Ezért a munka alatt alkalmazni kell a kezelő védelmét szolgáló biztonsági intézkedéseket: viseljen munkakesztyűt a használat során, korlátozza a gép használati idejét és lehetőleg rövid ideig tartsa nyoma a gázkart.</p>	<p>[1] LT - TECHNINIAI DUOMENYS</p> <p>[2] Maitinimo įtampa ir dažnis MAX [3] Maitinimo įtampa ir dažnis NOMINAL [4] Greitės tuščiaja eiga [5] Maksimalus oro greitis [6] Oro srautas [7] Išmatavimai [8] Ilgis [9] Aukštis [10] Plotis [11] Svoris be baterijos [12] Garso slėgio lygis (pagal „EN 50636-2-100“) [13] Matavimo paklaida [14] Išmatuotas garso galios lygis (pagal „EN 50636-2-100“) [15] Garantuojamas garso galios lygis (pagal „2000/14/EC“) [16] Vibracijų lygis (pagal „EN 50636-2-100“) [17] Priedai, kuriuos galima užsisakyti [18] Baterijos blokas [19] Baterijos įkoviklis</p> <p>a) PASTABA: bendras deklarujamas vibracijų lygis buvo išmatuotas laikantis standartizuotu bandymo metodu ir galii būti naudojamas lyginant vieną įrankį su kitu. Bendras vibracijų lygis galii būti naudojamas preliminariam vibracijų ivertinimui.</p> <p>b) SPĒJIMAS: vibracijų skleidimo lygis ekspluoatojui irenginių gali skirtis nubo deklaruojamuo vibracijos lygio, priklausomai nuo būdų, kai bus naudojamas įrankis. Del šios priežasties darbo metu yra būtina imtis saugos priemonių, susijusių su operatoriaus apsauga: naudojimo metu mūvėti prisiňės, riboti iрenginio darbo trukmę ir trumpinti laiką, kurio metu būna paspausta akceleratorius valdymo svirtis.</p>	<p>[1] LV - TEHNISKIE DATI</p> <p>[2] Barošanas spriegums un frekvence MAX [3] Barošanas spriegums un frekvence NOMINAL [4] Brīvgaitas ātrums [5] Maksimālais gaisa ātrums [6] Gaisa plūsma [7] Izmēri [8] Garums [9] Augstums [10] Platums [11] Svars bez bateriju paketes [12] Skanas spiediena līmenis (Saskaņā ar EN 50636-2-100 prasībām) [13] Mērījumu klāda [14] Izmēritā skanas intensitātes līmenis (Saskaņā ar EN 50636-2-100 prasībām) [15] Garantētās skanas intensitātes līmenis (Saskaņā ar 2000/14/EC prasībām) [16] Vibrāciju līmenis (Saskaņā ar EN 50636-2-100 prasībām) [17] Pieiderumi pēc pieprasījuma [18] Bateriju paketi [19] Akumulatoru lādētājs</p> <p>a) PIEZĪME: kopējā norādītā vibrāciju intensitātēs vērtība tikai izmērīta, izmantojot standarta pārbaudes metodi, un to var izmantot ierīci savstarpēji salīdzināšanai. Kopējo vibrāciju intensitātēs vērtību var izmantot arī sākotnēji eksplorācijas noverēšanai.</p> <p>b) BRIDINĀJUMS: vibrāciju līmenis ierīces faktiskās izmantošanas laikā var atskirīties no kopējās norādītās vērtības, atkarībā no ierīces izmantošanas veida. Tāpēc darba laikā ir svarīgi izmantot šādus operatāra aizsardzības līdzekļus: izmantošanas laikā valkājiet cīmrus, ierobežojiet mašīnas izmantošanas laiku un saisiniet laiku, kuru akceleratora vadības sviria atrodas nospiestā stāvoklī.</p>
<p>[1] MK - ТЕХНИЧНИ ПОДАТОЦИ</p> <p>[2] Волтаж и вид на напојување MAX [3] Волтаж и вид на напојување NOMINAL</p> <p>[4] Брзина без оптеретување [5] Максимална моќност на воздухот [6] Проток на воздух [7] Димензии [8] Должина На [9] Ширина На [10] Висина [11] Тежина без батерији [12] Ниво на акустичен притисок (според EN 50636-2-100) [13] Отстапување од мерената [14] Измерено ниво на акустична моќност (според EN 50636-2-100) [15] Гарантирано ниво на акустична моќност (според 2000/14/EC) [16] Ниво на вибрации (според EN 50636-2-100) [17] Додаточни достапни на барање [18] Батерији [19] Полнча за батерија</p> <p>а) ЗАБЕЛЕШКА: вкупната посочена вредност за вибрациите е измерена со пробен метод за нормализације и може да се користи за споредбена вредност на еден уред со друг. Вкупната вредност на вибрациите може да се користи и за предиминарна проценка на изложеноста.</p> <p>б) ВНИМАНИЕ: емисијата на вибрациите при ефективна употреба треба да се разликува од вкупната посочена вредност според начинот на употреба на уредот. Затоа е неопходно во текот на работата да се направат повеќе безбедносни мерели за да се заштити операторот: носете чевли во текот на употребата, ограничите го времето на употреба на машината и скратете го времето кога треба да се притисне раката за управување со забрзуваочот.</p>	<p>[1] NL - TECHNISCHE GEGEVENS</p> <p>[2] Spanning en frequentie voeding MAX [3] Spanning en frequentie voeding NOMINAL [4] Snelsheid onbelast [5] Maximale snelheid van de lucht [6] Luchtstroom [7] Afmetingen [8] Lengte [9] Breedte [10] Hoogte [11] Gewicht zonder batterij-eenheid [12] Niveau geluidsdruk (op basis van EN 50636-2-100) [13] Meetonderhoud [14] Gemeten akoestisch vermogen (op basis van EN 50636-2-100) [15] Gewaarborgd akoestisch vermogen (op basis van 2000/14/EC) [16] Niveau trillingen (op basis van EN 50636-2-100) [17] Optionele accessoires [18] Batterij-eenheid [19] Batterijlader</p> <p>а) ОПРЕМЕРНГ: де totale verklaarde waarde van de trillingen werd gemeten met een genormaliseerde testmethode en kan gebruikt worden voor een vergelijking tussen twee werktuigen. De totale waarde van de trillingen kan ook gebruikt worden in een voorafgaande evaluatie van de blootstelling.</p> <p>б) ВАРСЧУВАНГ: die emissie van trillingen bij het effectief gebruik van het werklijf kan verschillen van de totale verklaarde waarden, al naar gelang de manieren waarop het werklijf gebruikt wordt. Daarom is het noodzakelijk, tijdens het werk, de volgende veiligheidsmaatregelen toe te passen om de bediener te beschermen: handschoenen te gebruiken tijdens het gebruik, het gebruik van de machine te beperken en de bedieningshendel van de versnelling zo kort mogelijk ingedrukt te houden.</p>	<p>[1] NO - TEKNISKE DATA</p> <p>[2] Matespenning og -frekvens MAX [3] Matespenning og -frekvens NOMINAL [4] Hastighet uten belastning [5] Maksimal luft hastighet [6] Strøm av luft [7] Mål [8] Lengde [9] Høyde [10] Bredde [11] Vekt uten batterienhet [12] Lydrykknnivå (iht. EN 50636-2-100) [13] Målesirkkerhet [14] Målt lydefektivnivå (iht. EN 50636-2-100) [15] Garantert lydefektivnivå (iht. 2000/14/EC) [16] Vibrasjonsnivå (iht. EN 50636-2-100) [17] Tilleggsutstyr på forespørsel [18] Batterienhet [19] Batterilader</p> <p>а) МЕРК: oppgitt totalverdi for vibrasjonene har blitt målt ved å bruke en normal prøveteknologi og kan brukes for å sammenligne et redskap med et annet. Den totale vibrasjonsverdien kan også brukes i en foreløpig eksponeringsvurdering.</p> <p>б) ADVARSEI: emisjon av vibrasjoner ved effektiv bruk av redskapet kan avvike fra oppgitt totalverdi, i henhold til måten redskapet brukes på. Derfor er det nødvendig, under arbeidet, å ta i bruk følgende sikkerhetsstiltak for å beskytte operatoren: iføre seg håndsker ved bruk, begrense maskinenes brukstid og korte ned på tiden som man holder inne akkselerator kommandospaken.</p>

<p>[1] PL - DANE TECHNICZNE</p> <p>[2] Napięcie i częstotliwość zasilania MAX [3] Napięcie i częstotliwość zasilania NOMINAL [4] Prędkość bez obciążenia [5] Maksymalna prędkość powietrza [6] Przepływ powietrza [7] Wymiary [8] Długość [9] Wysokość [10] Szerokość [11] Ciężar bez zespołu akumulatora [12] Poziom ciśnienia akustycznego (zdogodnie z EN 50636-2-100) [13] Blad pomiaru [14] Poziom mocy akustycznej zmierzony (zdogodnie z EN 50636-2-100) [15] Gwarantowany poziom mocy akustycznej (zdogodnie z 2000/14/EC) [16] Poziom vibracji (zdogodnie z EN 50636-2-100) [17] Akcesoria dostępne na zamówienie [18] Zespół akumulatora [19] Ładowarka akumulatora a) Uwaga: Calkowita wskazana wartość drgania została zmierzona zgodnie ze znormalizowaną metodą badania i może być wykorzystana w celu dokonania porównania między dwoma urządzeniami. Calkowita wartość drgania może być również stosowana do wstępnej oceny zagrożenia. b) UWAGA: emisja drgan w praktycznym zastosowaniu niniejszego narzędzia może się różnić od deklarowanej wartości łącznej, w zależności od sposobu użytkowania urządzenia. Dlatego, w celu zapewnienia bezpieczeństwa użytkownika, konieczne jest podczas pracy z urządzeniem podjęcie następujących środków bezpieczeństwa: noszenie rękawic podczas korzystania z urządzenia, ograniczenie czasu użytkowania urządzenia i skrócenie czasu trzymania wcisniętej dźwigni regulacji obrótów silnika.</p>	<p>[1] PT - DADOS TÉCNICOS</p> <p>[2] Tensão e frequência de alimentação MAX [3] Tensão e frequência de alimentação NOMINAL [4] Velocidade sem carga [5] Velocidade máxima do ar [6] Fluxo de ar [7] Dimensões [8] Comprimento [9] Altura [10] Largura [11] Peso sem grupo bateria [12] Nível de pressão acústica (com base na EN 50636-2-100) [13] Incerteza de medição [14] Nível de potência acústica medida (com base na EN 50636-2-100) [15] Nível de potência acústica garantido (com base na 2000/14/EC) [16] Nível de vibrações (com base na EN 50636-2-100) [17] Acessórios a pedido [18] Grupo bateria [19] Carregador de bateria</p> <p>a) NOTA: o valor total declarado das vibrações foi mensurado de acordo com um método normalizado de ensaio e pode ser utilizado para comparar uma ferramenta com a outra. O valor total das vibrações também pode ser utilizado para uma avaliação preliminar da exposição. b) ADVERTÊNCIA: a emissão de vibrações no uso efetivo da ferramenta pode ser diversa do valor total declarado de acordo com os modos com os quais a ferramenta é utilizada. Portanto, durante o trabalho, é necessário adotar as seguintes medidas de segurança para proteger o operador: usar luvas durante o uso, limitar o tempo de utilização da máquina e encurtar o tempo durante o qual a alavanca de comando é mantida pressionada.</p>	<p>[1] RO - DATE TEHNICE</p> <p>[2] Tensiunea și frecvența de alimentare MAX [3] Tensiunea și frecvența de alimentare NOMINAL [4] Vitează fără sarcină [5] Viteza maximă a aerului [6] Flux de aer [7] Dimensiuni [8] Lungime [9] Lățime [10] Înălțime [11] Greutate fără grupul acumulator [12] Nivel de presiune acustică (în conformitate cu EN 50636-2-100) [13] Nesiguranță în măsurare [14] Nivel de putere acustică măsurat (în conformitate cu EN 50636-2-100) [15] Nivel de putere acustică garantat (în conformitate cu 2000/14/EC) [16] Nivel de vibrații (în conformitate cu EN 50636-2-100) [17] Accesorii la cerere [18] Grupul acumulator [19] Alimentator pentru baterie a) OBSERVAȚIE: valoarea totală declarată a vibrărilor a fost măsurată înțindându-se cont de o metodă de probă normalizată și poate fi utilizată pentru a compara instrumentele între ele. Valoarea totală a vibrărilor poate fi utilizată și pentru o evaluare preliminară a expunerii. b) AVERTISMENT: emisia de vibrații în utilizarea efectivă a instrumentului poate fi diferită față de valoarea totală declarată, în funcție de modurile în care se utilizează instrumentul. Din acest motiv este nevoie ca, în timpul sesiunii de lucru, să se adopte următoarele măsuri de siguranță menite să protejeze operatorul: purtarea mănușilor în timpul utilizării, limitarea duratei de utilizarea unei mașini și scurtarea duratei în care se ține apăsată maneta de comandă a acceleratorului.</p>
<p>[1] RU - ТЕХНИЧЕСКИЕ ХАРАКТЕРИСТИКИ</p> <p>[2] Напряжение и частота питания MAX [3] Напряжение и частота питания NOMINAL [4] Скорость без нагрузки [5] Максимальная скорость воздуха [6] Поток воздуха [7] Габариты [8] Длина [9] Высота [10] Ширина [11] Вес без аккумулятора [12] Уровень звукового давления (согласно EN 50636-2-100) [13] Погрешность измерения [14] Измеренный уровень звуковой мощности (согласно EN 50636-2-100) [15] Гарантируемый уровень звуковой мощности (согласно 2000/14/EC) [16] Уровень вибрации (согласно EN 50636-2-100) [17] При надежности - навесные орудия по заказу [18] Аккумулятор [19] Зарядное устройство a) ПРИМЕЧАНИЕ: общий заявленный уровень вибрации был измерен с использованием нормализованного метода испытаний, и его можно использовать для сравнения различных инструментов между собой. Общий уровень вибрации можно также использовать для предварительной оценки подверженности воздействию вибрации. b) ПРЕДПРЕЖДЕНИЕ: уровень вибрации во время фактической эксплуатации инструмента может отличаться от общего заявленного значения и зависит от режимов эксплуатации инструмента. Поэтому во время работы необходимо принимать следующие меры безопасности для защиты оператора: работать в перчатках, ограничивать время использования машины и сократить время, в течение которого рычаг управления дросселем остается нажатым.</p>	<p>[1] SK - TECHNICKÉ PARAMETRE</p> <p>[2] Napájacie napätie a frekvencia MAX [3] Napájacie napätie a frekvencia NOMINAL [4] Rýchlosť bez nákladu [5] Maximálna rýchlosť vzduchu [6] Prietok vzduchu [7] Rozmery [8] Dĺžka [9] Výška [10] Šírka [11] Váha akumulátorovej jednotky [12] Úroveň akustického tlaku (na základe EN 50636-2-100) [13] Nepresnosť merania [14] Úroveň nameraného akustického výkonu (na základe EN 50636-2-100) [15] Úroveň zarečeného akustického výkonu (na základe 2000/14/EC) [16] Úroveň vibrácií (na základe EN 50636-2-100) [17] Pridávanie zariadenia na požiadanie [18] Akumulátorová jednotka [19] Nabíjacia akumulátor a) POZNÁMKA: vyhľásená celková hodnota vibrácií bola nameraná s použitím normalizovanej skúšobnej metódy a je možné ju použiť na porovnanie jednotlivých nástrojov. Celková hodnota vibrácií môže byť použitá aj pri prípravnom vyhodnocovaní výstavenia vibráciám. b) VAROVANIE: emisie vibrácií pri skutočnom používaní nástroja môže byť odlišná od vyhľásenej celkovej hodnoty, v závislosti na rezimoch, pri ktorých sa dany nástroj používa. Pretože je potrebné počas práce prijať nižšie uvedené bezpečnostné opatrenia, ktoré majú za cieľ ochrániť operátora: počas bežnejho použitia majte nasadené rukavice, obmedzte dobu použitia stroja a skráťte doby, počas ktorých je zatlačená ovládacia páka plynu.</p>	<p>[1] SL - TEHNIČNI PODATKI</p> <p>[2] Napetost in frekvencija električnega napajanja MAX [3] Napetost in frekvencija električnega napajanja NOMINAL [4] Hitrost brez obremenitve [5] Maksimalna hitrost zraka [6] Pretok zraka [7] Dimenzije [8] Dolžina [9] Višina [10] Širina [11] Teža brez enote baterije [12] Raven zvočnega tlaka (glede na EN 50636-2-100) [13] Merilna negotovost [14] Izmerjena raven zvočne moči (glede na EN 50636-2-100) [15] Zajamčena raven zvočne moči (glede na 2000/14/EC) [16] Nivo vibracij (glede na EN 50636-2-100) [17] Dodatni priključki na zahtevo [18] Enota baterije [19] Polnilnik baterije</p> <p>a) OPOMBA: Deklarirana skupna vrednost vibracij je bila izmerjena v skladu z normirano metodo preizkušanja; mogče jo je uporabiti za primerjava med različnimi orodji. Skupna vrednost vibracij se lahko uporabi tudi za predhodno oceno izpostavitve. b) OPOZORILO: Med dejansko uporabo orodja se oddajane vibracije lahko razlikujejo od deklarirane skupne vrednosti, kar je odvisno od načina uporabe orodja. Zato je treba med delom udejanjati naslednje varnostne ukrepe za zaščito upravljalnika: med delom nositi rokavice, omejite čas uporabe stroja in skrajšajte intervale, med katerimi pritiske na komando vzdvod pospeševalnika.</p>

1. GENERAL INFORMATION

1.1 HOW TO READ THE MANUAL

Some paragraphs in the manual contain important information regarding safety and operation and are emphasized in this manner:

NOTE or **IMPORTANT** *These give details or further information on what has been previously indicated and aim to prevent damage to the machine or cause other damage.*

The  symbol highlights danger. Failure to observe the warning can lead to the risk of injury to oneself and others and/or damage.

The paragraphs highlighted in a square with grey spots indicate the optional characteristics not available on all models documented in this manual. Check if the characteristic is on this model.

Whenever reference is made to a position on the machine "front", "back", "left" or "right" hand side, this refers to the operator's working position.

1.2 REFERENCES

1.2.1 Figures

The figures in these instructions for use are numbered 1, 2, 3, etc.

Components shown in the figures are marked A, B, C, etc.

Reference to component C in figure 2 is indicated with the wording: "See fig. 2.C" or simply "(Fig. 2.C)".

The figures are given as a guide only.

The actual pieces can differ from those illustrated in this document.

1.2.2 Titles

The manual is divided into chapters and paragraphs. The title of paragraph "2.1 Training" is a sub-title of "2. Safety regulations". References to titles or paragraphs are marked with the abbreviation chap. or par. and the relevant number. Example: "chap. 2" or "par. 2.1".

2. SAFETY REGULATIONS

2.1 TRAINING

⚠️ Become familiar with the controls and the proper use of the machine. Learn how to stop the machine quickly. Failure to follow the warnings and instructions may result in fire and/or serious injury.

- Never allow children, persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge or persons unfamiliar with these instructions to use the machine. Local regulations may restrict the age of the operator.
- Never use the machine if the user is tired or unwell, or has taken medicine, drugs, alcohol or any substances which may slow their reflexes and compromise their judgement.
- Bear in mind that the operator or user is responsible for accidents or unexpected events occurring to other people or their property. It is the user's responsibility to assess the potential risk of the area where work is to be carried out and to take all the necessary precautions to ensure his own safety and that of others, particularly on slopes or rough, slippery and unstable ground.
- If the machine is sold or lent to others, make sure that the operator looks over the user instructions contained in this manual.

2.2 PREPARATION

Personal Protective Equipment (PPE)

- Wear suitable clothing, strong work shoes with anti-slip soles, and long pants. Do not operate the machine barefoot or wearing open sandals. Wear ear-protection devices, anti-vibration gloves, protective goggles, and a half mask respirator.
- Use of hearing protections can reduce the ability to hear any warnings (shouting or alarms). Be careful of what occurs around you in the work area.
- Never wear scarves, shirts, necklaces, bracelets, loose flowing clothing, laces or ties or any hanging or flapping accessory that could catch in the machine or in any objects or materials in the work area.
- Keep hair away from the air intake grille, as it could get tangled in the rotor and cause serious injuries. Tie your hair back if it is long.

Work area / Machine

- Thoroughly inspect the whole work area and use a rake or yard brush to manually untangle debris, remove anything that could be projected by the machine (when used as a blower), block the vacuum tube (when the machine is used as vacuum collector), or be a source of hazard (stones, branches, steel wire, bones etc.).

- When operating in dry dusty soil conditions, it is recommended to moisten the surface slightly.
- To avoid the risk of fire, do not leave the machine with the motor hot on leaves or dry grass.

2.3 DURING OPERATION

Work area

- Do not use the machine in environments at risk of explosion, in the presence of flammable liquids, gas or powder. Power tools create sparks which may ignite the dust or fumes.
- Work only in daylight or with good artificial light in good visibility conditions.
- Keep persons, children and animals away from the working area. Get another adult to keep the children under supervision. Children shall not play with the appliance.
- Check that there is nobody within at least 15 metres of the machine's range of operation.
- Avoid working with wet grass, in the rain and when there is a risk of a thunderstorm, especially lightning.
- Where possible, avoid working on wet, slippery ground or in any case on uneven or steep ground that does not guarantee stability for the operator.

- Do not expose the machine to rain or wet environments. Water entering a power tool will increase the risk of electric shock.
- Pay careful attention to uneven ground (hills, dips), slopes, hidden hazards and obstacles that could limit visibility.
- Be very careful near ravines, ditches or embankments.
- Look out for traffic when using the machine near the road.
- Always assess wind direction and never work against the wind.
- Do not use of the machine near open windows.
- Do not use the machine on paved or gravel-covered surfaces, to avoid that the removed material causes injuries.
- Do not allow processed material to build up in the discharge zone; this may prevent proper discharge and can result in kickback of material through the intake opening.

Behaviour

- When performing work utilising the machine as blower, the machine must always be held firmly with the right hand on the upper handgrip.
- When performing work utilising the machine as vacuum collector, the machine must always be held firmly with both hands, with the right hand on the upper handgrip and the left hand on the lower handgrip, so that the collection bag is on the operator's left.

- Avoid body contact with earthed or grounded surfaces, such as pipes, radiators, cookers and refrigerators. There is an increased risk of electric shock if your body is earthed or grounded.
- Always use caution and take on a firm and well-balanced position.
- Do not lose your balance.
- Make sure to avoid violent impacts against foreign bodies and prevent the air flow from throwing any material and dust.
- Do not direct the air jet towards persons or animals.
- When used as a blower always pay the utmost attention to prevent removed material or dust from injuring people or animals or damaging property.
- Never insert objects into the vacuum inlet (when being used as vacuum collector) and avoid the intake of large objects that could damage the rotor.
- Never run, always walk.
- Always keep your face, hands, and body away from the intake grille and air outlet and do not obstruct the airways both when starting and utilising the machine.
- The rotating parts can cause serious injuries; avoid contact with these parts while they are still rotating.
-  If something breaks or an accident occurs during work, turn off the motor immediately and move the machine away to prevent further damage; if an accident occurs with injuries or third parties are injured, carry out the first aid measures most suitable for the situation immediately and contact the medical authorities for any necessary health care. Carefully remove any debris which could cause damage or injury to persons or animals if ignored.
-  Prolonged exposure to vibrations can cause injuries and neurovascular disorders (also called "Raynaud's syndrome" or "white finger"), especially to people suffering from circulation disorders. The symptoms can regard the hands, wrists and fingers and are shown through loss of sensitivity, torpor, itching, pain and discolouring of or structural changes to the skin. These effects can be worsened by low ambient temperatures and/or by gripping the hand grips excessively tightly. If the symptoms occur, the length of time the machine is used must be reduced and a doctor consulted.

Use limitations

- Do not use the machine if you are unable to hold it with both hands or keep steady on your legs while working.
- Never use the machine with damaged, missing or incorrectly positioned guards.
- Never use the machine without having installed all the attachments required for each use (as blower or vacuum collector).
- Never disengage, deactivate, remove or tamper with the safety systems/micro switches installed.
- Do not use the power tool if the switch does not turn it on and off. Any power tool that cannot be controlled with the switch is dangerous and must be repaired.
- Do not strain the machine too much and do not use a small machine for heavy-duty work; if you use the right machine, you will reduce the risk of hazards and improve the quality of your work.

2.4 MAINTENANCE, STORAGE

Ensure regular maintenance and correct storage to maintain machine safety and high performance levels.

Maintenance

- Never use the machine with worn or damaged parts. Faulty or worn-out parts must always be replaced and never repaired.

- Cleaning and user maintenance shall not be made by children without supervision.

 The noise and vibration levels shown in these instructions are the maximum levels for use of the machine. Suitable preventive measures must be adopted to eliminate possible harm caused by high noise levels and vibration-induced stresses; utilise the machine at constant speed, firmly hold the handgrip with adequate strength, utilise the machine at the minimum speed required to perform the work, wear ear-protection devices, make frequent and adequate pauses during the work.

Storage

- To reduce fire risks, do not leave containers with debris inside a room.

2.5 BATTERY / BATTERY CHARGER

IMPORTANT *The following safety instructions are in addition to the safety requirements provided in the specific battery and battery charger manual delivered with this machine.*

- Only use battery chargers recommended by the manufacturer to recharge batteries. An inadequate battery charger may cause electric shock, overheating or corrosive liquid to leak from the battery.

- Use only batteries specifically designed for your power tool. The use of other batteries may cause injuries and fire risks.
- Make sure that the machine is switched off before inserting the battery. Inserting a battery in a machine which is switched on can cause a fire.
- Keep all unused batteries at a distance from paper clips, coins, keys, nails, screws or other small metal objects as contact with the same can cause short circuits. Short circuits between battery contacts can lead to explosion or fires.
- Never use the battery charger in environments in the presence of vapours, flammable substances or on easily flammable surfaces such as paper, fabric, etc. The battery charger heats up during recharging and may cause a fire.
- When transporting batteries, make sure the contacts never come into contact with each other and never use metal containers to transport them.

2.6 ENVIRONMENTAL PROTECTION

Safeguarding the environment must be a relevant and priority aspect of machine use, of benefit to the community and the environment we live in.

- Avoid being a disturbance to the neighbourhood. Use this machine at reasonable times of the day only (not early morning or late evening when the noise could cause disturbance).

- Scrupulously comply with local regulations for the disposal of packaging, deteriorated parts or any elements with a strong environmental impact; this waste must not be disposed of as normal waste, it must be separated and taken to specified waste disposal centres where the material will be recycled.
- Scrupulously comply with local regulations for the disposal of waste materials
- When the machine is withdrawn from service, do not dump it in the environment, but take it to a waste disposal facility in accordance with the local regulations in force.

Do not throw electrical equipment away with domestic waste. According to the European Directive 2012/19/EU on electrical and electronic equipment waste and its implementation in compliance with national standards, old electrical equipment must be collected separately, for eco-compatible recycling. If electrical equipment is disposed of in a landfill or in the ground, the harmful substances can reach the water table and enter the food chain, damaging your health and well-being.

For further information on the disposal of this product, contact your dealer or a domestic waste collection service.

At the end of their working life, dispose of batteries paying due attention to the environment.

Batteries contain material classified as hazardous for you and the environment. They must be removed and disposed of separately at a facility that accepts lithium-ion batteries.

Separate waste collection of the products and packaging used allows the materials to be recycled and reused. Reuse of recycled materials help to prevent environmental pollution and reduces the demand for raw materials.

2.7 RESIDUAL RISKS

Even all the safety rule are obeyed, there still can be a certain residual risk, which cannot be excluded. From the kind and construction of the tool the foreseeable potential endangerments can be:

- Hurled materials that may injure the eyes;
- Damage of the hearing, if no protection of the ears is carried.

3. GETTING TO KNOW THE MACHINE

3.1 DESCRIPTION OF THE MACHINE AND PLANNED USE

This machine is a garden tool, specifically a portable battery-powered garden blower.

It basically consists in a motor that activates a rotor which is able to produce a high-speed air flow.

3.1.1 Intended use

This machine was designed and manufactured for:

- the movement and accumulation, by blowing, of leaves, grass, debris of various limited weight and modest dimensions.

3.1.2 Improper use

Any other usage not in keeping with the above-mentioned ones may be hazardous and harm persons and/or damage things. Examples of improper use may include, but are not limited to:

- accumulation and collection of inflammable or explosive products, hot embers or combustion material without a flame, lit cigarettes, pieces of glass, sharp objects, metal objects, stones and any other object that could be dangerous to the operator and others;
- aiming the air shot towards persons and/or animals;
- allowing object to enter the suction grid;
- using the machine without the accessories specifically supplied by the manufacturer for specific uses, or use of accessories in a way not intended in these instructions;
- using of the machine by more than one person.

IMPORTANT *Improper use of the machine will invalidate the warranty, waive the Manufacturer from all liability, and the user will consequently be liable for all and any damage or injury to himself or others.*

3.1.3 User types

This machine is intended for use by consumers, i.e. non-professional operators. The machine is intended for "DIY" use only.

3.2 SAFETY SIGNS

The machine has various symbols on it (fig. 2). They are used to remind the operator of the behaviour to follow to use it with the necessary attention and caution.

Meaning of symbols:

WARNING! DANGER! The failure to use this machine correctly can be hazardous for oneself and others.

WARNING! Read the instruction manual before using the machine.

Use ear protection devices and goggles.

Do not leave the machine in the rain (or in damp conditions).

PROJECTION HAZARD! Pay attention to possible flying debris projected by the air flow: which may cause serious injuries to persons or damage to objects.

PROJECTION HAZARD! People or pets must be kept at least 15 m away when using the machine!

Mutilation hazard! Always keep the hands away from the air intake grille. The rotor in motion can cause serious injuries.

Serious injury hazard! Keep loose clothing away from the air intake grille, since it could become trapped in the rotor and cause serious injuries.

Serious injury hazard! Keep hair away from the air intake grille, since it could become trapped in the rotor and cause serious injuries. Tie your hair back if it is long.

IMPORTANT Any damaged or illegible decals must be replaced. Order replacement decals from an Authorised Service Centre.

3.3 PRODUCT IDENTIFICATION LABEL

The product identification label provides the following data (fig. 1):

1. Name and address of Manufacturer
2. Type of machine
3. Sound power level
4. Conformity marking
5. Power voltage and frequency
6. Year of manufacture
7. Serial number
8. Article code
9. Class II; Dual insulation

Write the identification data of the machine in the specific space on the label on the back of the cover page.

IMPORTANT Quote the information on the product identification label whenever you contact an Authorised Service Centre.

IMPORTANT The example of the Declaration of Conformity is provided on the last pages of the manual.

3.4 MAIN COMPONENTS

The machine is composed of a series of main components that have the following functions (Fig.1):

- A. **Power unit:** it drives the rotor.
- B. **Blower tube:** it is the component through which the air flow is discharged.
- C. **Handgrip:** it makes it possible to control the machine.
- D. **Battery** (accessory available upon request, paragraph 14.1): device that supplies electric current to the tool; its specifications and regulations for use are described in a specific manual.

- E. Battery charger** (accessory available upon request, par. 14.2): device used to recharge the battery; its specifications and regulations for use are described in a specific manual. Two battery charger models are available: **E1** (fast battery charge); **E2** (standard battery charge).

4. ASSEMBLY

IMPORTANT *The safety regulations to follow are described in chap. 2. Strictly comply with these indications to avoid serious risks or dangers.*

For storage and transport purposes, some components of the machine are not installed in the factory and have to be assembled after unpacking. Follow the instructions below.

⚠️ Unpacking and completing the assembly should be done on a flat and stable surface, with enough space for machine handling and its packaging, always making use of suitable equipment. Do not use the machine until all the indications provided in the "ASSEMBLY" section have been carried out.

4.1 ASSEMBLY COMPONENTS

The packaging includes assembly components.

4.1.1 Unpacking

1. Carefully open the packaging, paying attention not to lose components.
2. Consult the documentation in the box, including these instructions.
3. Remove all the unassembled parts from the box.
4. Remove the machine from the box.
5. Dispose of the box and packaging in compliance with local regulations.

⚠️ Before assembling, make sure the battery is not inserted in its housing.

4.1.2 Assembly / disassembly of the blower tube

1. Align the locking device (Fig.3.A) with the protrusion (Fig. 3.B) on the air outlet (Fig. 3.C).

2. Push the tube (Fig. 3.D) until it hooks up firmly with the drive unit with a "click" when it locks in place.

- To remove the tube, press the button (Fig. 3.A) and then slide it out.

IMPORTANT *Stop the machine and always remove the battery (paragraph 7.2.2) whenever the blower tube is removed.*

5. CONTROLS

5.1 SAFETY BUTTON (ACTIVATION / DEACTIVATION DEVICE)

Press this button (Fig. 5.A) to activate and deactivate the machine's electrical circuit; the corresponding LED comes "ON" (Fig. 5.C).

Pressing the speed button (Fig.5.D) sets the air power and the 3 corresponding LEDs come "ON" (Fig. 5.F). If work is interrupted (without turning off the machine), on resumption the machine will start again at the previously set speed.

LEDs off: The electrical circuit is completely deactivated.

IMPORTANT *Do not keep your finger on the button when moving the machine to avoid accidentally enabling the machine.*

The "Warning" icon (Fig. 5.E) comes ON in the event of machine fault (refer to the troubleshooting table, par. 13).

5.2 THROTTLE CONTROL LEVER

Operating the throttle control lever (Fig. 5.F) allows the machine to start / stop and simultaneously engages / disengages the cutting means.

For machine start up:

- press the throttle control lever.

The machine stops automatically as the throttle control lever is released.

6. USING THE MACHINE

IMPORTANT The safety regulations to follow are described in chap. 2. Strictly comply with these indications to avoid serious risks or dangers.

6.1 PREPARATION

Before starting to work, it is necessary to carry out several checks and operations to ensure you can work efficiently and in maximum safety.

6.1.1 Checking the battery

The machine is supplied without the battery. Purchase the battery with the capacity that most suits your operational requirements and fully charge it according to the instructions in the battery booklet.

The list of approved batteries for this machine is found in the "Technical Data" table.

- Before each use:
 - check the battery charge status according to the instructions in the battery booklet.

6.2 SAFETY CHECKS

Run the following safety checks and check that the results correspond to those outlined on the tables.

⚠ Always carry out the safety checks before use.

6.2.1 General check

Object	Result
Hand grips (Fig. 1.C.)	Are clean, dry and fixed firmly to the machine
Screws on the machine	Correctly tightened (not loose)
Cooling air ducts	Not clogged
Blower tube (Fig. 1.B.)	Correctly installed.
Rotor	No signs of damage
Guards	No signs of damage
Battery (Fig. 1.D.)	No damage to the casing, no liquid leakage
Machine	No signs of damage or wear

Throttle control (Fig. 5.F)	It must move freely and not be forced.
Test driving	No abnormal vibrations. No abnormal sound

6.2.2 Machine operating test

Action	Result
1. Fit the battery inside its housing (par. 7.2.3). 2. Switch on the machine by pressing the button (Fig. 5.A). 3. Press the throttle control (Fig. 5.F).	The machine starts and the rotor starts rotating.
1. Release the throttle control (Fig. 5.F).	1. The control should return automatically and quickly to the neutral position and the machine should stop.

⚠ If any of the results fail to match the indications provided in the tables below, do not use the machine! Take it to a service centre to be checked and repaired if necessary.

6.3 START-UP

1. Adopt a firm and well-balanced position;
2. make sure that the blower tube is not directed towards any bystanders or debris;
3. fit the battery inside its housing correctly (par. 7.2.3);
4. press the safety button (Fig. 5.A)
5. press the throttle control (Fig. 5.F).

6.4 OPERATION

⚠ When performing work, the machine must always be held firmly with the right hand on the upper handgrip (Fig 4).

NOTE During use, the battery is protected against total drainage with a protective device that switches off the machine and stops it from working.

NOTE After one minute of inactivity, if turned on, the machine will automatically switch off.

6.4.1 Adjusting the speed

it is always advisable to set the rotor speed in relation to the type of material to be removed using the button (Fig. 5.B).removed:

- low blowing speed to move light material and small branches on the lawn;
- medium blowing speed to move grass and light leaves on asphalt or packed soil;
- high blowing speed (3 LEDs lit, Fig. 5.D) for heavier materials such as fresh snow or bulky dirt.

6.4.2 Advice for operation

Proceed slowly keeping the end of the blower tube at a suitable distance from the ground (Fig. 4).

To avoid dispersing the material to be removed, direct the air flow towards the outer edges of the pile of material. Never direct the air flow to the middle of the pile.

6.5 STOP

To stop the machine:

1. release the throttle control lever (Fig. 5.F);
2. deactivate the safety button (Fig. 5.A)
3. wait until the cutting means stops.

 ***It takes a few seconds for the rotor to stop after the machine has been turned off.***

Always stop the machine:

- when moving between work areas.

 ***When moving, never leave your hand on the throttle control in order to avoid accidental start-ups.***

6.6 AFTER USE

- Remove the battery from its housing and recharge it (par. 7.2.2).
- Allow the motor to cool before storing in an enclosed space.
- Clean (par. 7.3).
- Check there are no loose or damaged components. If necessary, replace the damaged components and tighten any screws and loose bolts or contact the authorised service centre.

IMPORTANT Always remove the battery (par. 7.2.2) whenever the machine is unused or left unattended.

7. ROUTINE MAINTENANCE

7.1 GENERAL INFORMATION

IMPORTANT The safety regulations to follow are described in chap. 2. Strictly comply with these indications to avoid serious risks or dangers.

 **Prior to carrying out any maintenance operation, you need to:**

- **stop the machine;**
- **Remove the battery from its housing and recharge it (par. 7.2.2);**
- **allow the motor to cool before storing in an enclosed space;**
- **use suitable clothing, protective gloves and goggles;**
- **read the relevant instructions.**

 ***Warning! Risk of injuries due to dangerous moving parts!***

- The frequency and types of maintenance are summarised in the "Maintenance Table" (see chapter 12). The table will help you maintain your machine's safety and performance. It summarises the main interventions to be made and the frequency applicable to each of them. Carry out the relevant task as soon as it is scheduled to be performed.
- The use of non-genuine spare parts and attachments could adversely affect machine operation and safety. The manufacturer declines all liability for any damage or injuries caused by these products.
- Genuine spare parts are supplied by Authorised Assistance Centres and Dealers.

IMPORTANT Any maintenance and adjustment operations not described in this manual must be carried out by your dealer or Authorised Service Centre.

7.2 BATTERY

7.2.1 Battery power reserve

Battery power reserve (and therefore the cuttable area before recharging is required) mainly depends on:

- operator behaviour that should be avoided:
 - switching the machine on and off frequently whilst working;
 - a rotor speed not suited to the type of material to be removed (paragraph 6.4.1).

To optimise battery power reserve it is always recommended to:

- set a rotor speed suited to the type of material to be removed.

If the need arises to use the machine for sessions which exceed the capability of a standard battery, it is possible to:

- purchase a second standard battery to immediately replace the discharged battery, without compromising the continuity of operations;
- purchase a battery with an extended power reserve compared to the standard version (par. 14.1).

7.2.2 Battery removal and recharging

- Press the locking button located in the battery housing (Fig. 6.A) and remove the battery (Fig. 6.B);
- fit the battery (Fig. 7.A) in the battery charger housing (Fig. 7.B);
- connect the battery charger (Fig. 7.B) to a power socket with the voltage indicated on the rating plate;
- fully charge the battery according to the instructions in the battery/battery charger booklet.

NOTE The battery is equipped with a guard that inhibits recharging if the environmental temperature is not between 0 and +45 °C.

NOTE The battery can be recharged at any time, even partially, with no risk of damaging it.

7.2.3 Refitting the battery on the machine

When recharging is completed:

- Remove the battery (Fig. 8.A) from the housing in the battery charger (do not keep recharging when recharging is completed);
- disconnect the battery charger (Fig. 8.B) from the electrical mains;

- fit the battery (Fig. 9.A) in its housing pressing down until you hear it click firmly into position and check the electrical contact;

7.3 CLEANING THE MACHINE AND THE MOTOR

To reduce fire hazards, keep the machine and, in particular, the motor free of leaves, branches.

- Always clean the machine after use with a damp cloth dipped in neutral detergent.
- Remove all traces of humidity using a soft damp cloth. Humidity can generate risks of electric shocks.
- Do not use aggressive detergents or solvents to clean the plastic parts or hand grips.
- Do not spray water onto the motor and electrical components and prevent them from getting wet.
- Always keep the rotor clean and free of dust and debris, by blowing compressed air through the grille. Do not spray water on the rotor.
- To avoid overheating and damage to the motor or the battery, always keep the cooling air vents clean and free of debris.

7.4 NUTS AND BOLTS

- Keep all nuts, bolts and screws tight to be sure the equipment is in safe working condition.
- Check regularly that the handles are fixed firmly.

8. STORAGE

IMPORTANT The safety regulations to follow for putting into storage are described in paragraph 2.4. Strictly comply with these instructions to avoid serious risks or hazards.

8.1 STORING

When the machine is to be stored away:

- remove the battery from its housing and recharge it (par. 7.2.2);
- allow the motor to cool before storing in an enclosed space;

3. clean (par. 7.3);
4. make sure there are no loose or damaged components. If necessary, replace any damaged components and tighten any screws and loose bolts or contact the authorised service centre;
5. store the machine:
 - in a dry place;
 - protected from inclement weather;
 - in a place out of children's reach;
 - making sure that keys or tools used for maintenance are removed.

8.2 STORING THE BATTERY

The battery must be kept in a cool, shaded place without humidity.

NOTE *If unused for any length of time, recharge the battery every two months to prolong its working life.*

9. HANDLING AND TRANSPORTATION

Whenever the machine is to be handled or transported you must:

- stop the machine (par. 6.5);
- remove the battery from its housing and recharge it (par. 7.2.2);
- only hold the machine using the handgrips and position the tubes so that they do not cause obstruction.

When transporting the machine on a vehicle, always:

- remove the tubes;
- fasten the machine securely with cables or chains;
- position it so that it can not cause a hazard for anybody.

10. ASSISTANCE AND REPAIRS

This manual provides all the necessary information to run the machine and for correct basic maintenance operations which can be performed by the user. Any regulations and maintenance operations not described herein must be carried out by your Dealer or Authorised Service Centre, which have

the necessary knowledge and equipment to ensure that the work is carried out correctly, maintaining the correct degree of safety and the original operating conditions of the machine. Any operations performed in unauthorised centres or by unqualified persons will totally invalidate the warranty and all obligations and responsibilities of the manufacturer.

- Only Authorised Service Centres can carry out guaranteed repairs and maintenance.
- The Authorised Service Centres only use genuine spare parts. Genuine spare parts and attachments have been designed specifically for machines.
- Non-original parts and attachments are not approved; use of non-original spare parts and attachments will jeopardise the safety of the machine and relieve the Manufacturer from all obligations or liabilities.
- It is advisable to send your machine once a year to an Authorised Service Centre for servicing, assistance and safety device inspection.

11. WARRANTY COVERAGE

The warranty covers all material and manufacturing defects. The user must follow all the instructions provided in the accompanying documentation.

The warranty does not cover damage caused by:

- failure to become familiar with the documentation accompanying the machine;
- carelessness;
- incorrect or forbidden use or assembly;
- use of non-genuine spare parts;
- use of attachments not supplied or not approved by the manufacturer.

The warranty does not cover:

- normal wear and tear of consumable materials;
- normal wear and tear.

The purchaser is protected by his or her own national legislation. The purchaser's rights under the national laws or his or her own country are not in any way restricted by this warranty.

12. MAINTENANCE TABLE

Intervention	Frequency	Notes
MACHINE		
Check all fasteners	Before each use	par. 7.4
Safety checks/check controls	Before each use	par. 6.2
Check the battery charge status	Before each use	*
Recharge the battery	After each use	par. 7.2.2 *
Cleaning the machine and the motor	After each use	par. 7.3
Checking for any damage to the machine. If necessary, contact the authorised service centre.	After each use	-

* Refer to the battery/battery charger manual.

13. TROUBLESHOOTING

PROBLEM	PROBABLE CAUSE	SOLUTION
1. The machine does not start when the throttle control is activated	Battery is not inserted or is inserted incorrectly	Make sure that the battery is inserted well (par. 7.2.3)
	Low battery	Check the battery status and recharge if necessary (par. 7.2.2)
	Faulty throttle control or damaged blower	Do not use the machine. Immediately turn off the machine, remove the battery and contact a service centre.
2. The motor shuts down whilst working	Battery is not inserted correctly	Make sure that the battery is inserted well (par. 7.2.3)
	Low battery	Check the battery status and recharge if necessary (par. 7.2.2)
3. The rotor rotates, but the air does not come out from the blower tube	Blocked or clogged blower tube	Stop the machine, remove the battery and remove any obstructions.
4. Excessive noise and/or vibration is experienced whilst working	Loose or damaged parts	Turn off the machine remove the battery and: <ul style="list-style-type: none"> – inspect for damage; – check for and tighten any loose parts; – have any damaged parts replaced or repaired with parts having equivalent specifications.
5. The machine gives off smoke whilst working	Damaged blower.	Do not use the machine. Immediately turn off the machine, remove the battery and contact a service centre.
6. Battery power reserve is low	Severe working conditions requiring greater current absorption	Optimise operations (par. 7.2.1)
	Battery is insufficient for operating requirements	Use a second battery or extended battery (par. 14.1)
	Decrease in battery capacity	Purchase a new battery

PROBLEM	PROBABLE CAUSE	SOLUTION
7. The battery charger is not recharging the battery	Battery is not correctly inserted in the battery charger	Check it is correctly inserted (par. 7.2.3)
	Unsuitable environmental conditions	Recharge the battery in places with suitable temperatures (see battery/battery charger instruction manual)
	Dirty contacts	Clean the contacts
	The battery charger is not energised	Check it is plugged in and the power socket is energised
	Faulty battery charger	Replace with an original spare part
		If the problem persists, refer to the battery/battery charger manual
8. The LED indicator (Fig. 5.E) remains ON in steady mode	Self-check failed	Do not use the machine. Immediately turn off the machine, remove the battery and contact a service centre.
9. The LED indicator (Fig. 5.E) remains ON in flashing mode	Battery communication error	Do not use the machine. Immediately turn off the machine, remove the battery and contact a service centre.
	Rotor blocked	Do not use the machine. Immediately turn off the machine, remove the battery and contact a service centre.
	Current overload	Optimize machine usage.
	PCB overheated	Do not use the machine. Immediately turn off the machine, remove the battery and contact a service centre.

If problems persist after having performed the operations described above, contact your dealer.

14. ACCESSORIES ON REQUEST

14.1 ALTERNATIVE BATTERIES

Different capacity batteries are available to suit specific operating requirements (Fig. 10). The list of approved batteries for this machine is found in the "Technical Data" table.

14.2 BATTERY CHARGER

Device used to recharge the battery: fast (Fig. 11.A), standard (Fig. 11.B).

DICHIARAZIONE CE DI CONFORMITÀ

(Istruzioni Originali)
(Direttiva Macchine 2006/42/CE, Allegato II, parte A)

1. **La Società:** STIGA S.p.A. – Via del Lavoro, 6 – 31033 Castelfranco Veneto (TV) – Italy
