

CP1 434 Series

CP1 484 Series

CP1 534 Series

- IT** Tosaerba con conducente a piedi - MANUALE DI ISTRUZIONI
ATTENZIONE: prima di usare la macchina, leggere attentamente il presente libretto.
- BG** Косачка с изправен водач - УПЪТВАНЕ ЗА УПОТРЕБА
ВНИМАНИЕ: преди да използвате машината прочетете внимателно настоящата книжка.
- BS** Kosilica na guranje - UPUTSTVO ZA UPOTREBU
PAŽNJA: prije nego što koristite ovu mašinu, pažljivo pročitajte priručnik s uputama.
- CS** Sekačka se stojící obsluhou - NÁVOD K POUŽITÍ
UPOZORNĚNÍ: před použitím stroje si pozorně přečtěte tento návod k použití.
- DA** Plæneklipper betjent af gående personer - BRUGSANVISNING
ADVARSEL: læs instruktionsbogen omhyggeligt igennem, før du tager denne maskine i brug.
- DE** Handgeführter Rasenmäher - GEBRAUCHSANWEISUNG
ACHTUNG: vor inbetriebnahme des geräts die gebrauchsanleitung aufmerksam lesen.
- EL** Χλοοκοπτική μηχανή με όρθιο χειριστή - ΟΔΗΓΙΕΣ ΧΡΗΣΗΣ
ΠΡΟΣΟΧΗ: πριν χρησιμοποιήσετε το μηχάνημα, διαβάστε προσεκτικά το παρόν εγχειρίδιο.
- EN** Pedestrian controlled lawnmower - OPERATOR'S MANUAL
WARNING: read thoroughly the instruction booklet before using the machine.
- ES** Cortadora de pasto con operador de pie - MANUAL DE INSTRUCCIONES
ATENCIÓN: antes de utilizar la máquina, leer atentamente el presente manual.
- ET** Seisva juhiga muruniitja - KASUTUSJUHEND
TÄHELEPANU: enne masina kasutamist lugeda tähelepanelikult antud kasutusjuhendit.
- FI** Kävelen ohjattava ruohonleikkuri - KÄYTTÖOHJEET
VAROITUS: lue käyttöopas huolellisesti ennen koneen käyttöä.
- FR** Tondeuse à gazon à conducteur à pied - MANUEL D'UTILISATION
ATTENTION: lire attentivement le manuel avant d'utiliser cette machine.
- HR** Ručno upravljana kosilica trave - PRIRUČNIK ZA UPORABU
POZOR: prije uporabe stroja, pažljivo pročitajte ovaj priručnik.
- HU** Gyalogvezetésű fűnyírógép - HASZNÁLATI UTASÍTÁS
FIGYELEM! a gép használatá előtt olvassa el figyelmesen a jelen kézikönyvet.
- LT** Pėsčio operatoriaus valdoma vejarpjovė - NAUDOJIMO INSTRUKCIJOS
DĖMESIO: prieš naudojant įrenginį, atidžiai perskaityti šį naudotojo vadovą.
- LV** No aizmugures ejot vadāma zāliena plaujmašina
LIETOŠANAS INSTRUKCIJA - UZMANĪBU: pirms aparāta lietošanas rūpīgi izlasiet doto instrukciju.
- MK** Тревокосачна со оператор на носе - УПАТСТВА ЗА УПОТРЕБА
ВНИМАНИЕ: прочитайте го внимателно ова упатство пред да ја користите машината.
- NL** Lopend bediende grasmaaier - GEBRUIKERSHANDLEIDING
LET OP: vooraleer de machine te gebruiken, dient men deze handleiding aandachtig te lezen.
- NO** Håndført gressklipper - INSTRUKSJONSBOK
ADVARSEL: les denne bruksanvisningen nøye før du bruker maskinen.
- PL** Kosiarzka prowadzona przez operatora pieszego
INSTRUKCJE OBSŁUGI - OSTRZEŻENIE: przed użyciem maszyny, należy uważnie przeczytać niniejszą instrukcję.
- PT** Corta-relvas para operador a pé - MANUAL DE INSTRUÇÕES
ATENÇÃO: antes de usar a máquina, leia atentamente o presente manual.
- RO** Maşină de tuns iarba cu conducător pedestru
MANUAL DE INSTRUCȚIUNI - ATENȚIE: înainte de a utiliza maşina, citiți cu atenție manualul de față.
- RU** Газонокосилка с пешеходным управлением
РУКОВОДСТВО ПО ЭКСПЛУАТАЦИИ - ВНИМАНИЕ: прежде чем пользоваться оборудованием, внимательно прочтите это руководство по эксплуатации.
- SK** Kosačka so stojacou obsluhou - NÁVOD NA POUŽITIE
UPOZORNENIE: pred použitím stroja si pozorne prečítajte tento návod.
- SL** Kosilnica za stoječega delavca - PRIROČNIK ZA UPORABO
POZOR: preden uporabite stroj, pazljivo preberite priručnik z navodili.
- SR** Kosačica na guranje - PRIRUČNIK SA UPUTSTVIMA
PAŽNJA: pre korišćenja mašine pažljivo pročitati ovaj priručnik.
- SV** Förarledt gräsklippare - BRUKSANVISNING
VARNING: läs igenom hela detta häfte innan du använder maskinen.
- TR** Ayak kumandalı çim biçme makinesi - KULLANIM KILAVUZU
DİKKAT: makineyi kullanmadan önce talimatlar içeren kilavuzu dikkatle okuyun.

ITALIANO - Istruzioni Originali	IT
БЪЛГАРСКИ - Инструкция за експлоатация	BG
BOSANSKI - Prijevod originalnih uputa	BS

1. GENERAL INFORMATION

1.1 HOW TO READ THE MANUAL

Some paragraphs in the manual contain important information regarding safety and operation and are emphasised in this manner:

NOTE OR IMPORTANT *these give details or further information on what has already been said, and aim to prevent damage to the machine.*

This  symbol highlights danger. Failure to observe the warning can lead to possible personal and/or third party injury and/or damage.

- The paragraphs highlighted in a square with grey spots indicate the optional characteristics not on all models documented in this manual. Check if the characteristics are available on this model.

Whenever reference is made to a position on the machine "front", "back", "left" or "right" hand side, this refers to the operator's driving position.

1.2 REFERENCES

1.2.1 Figures

The figures in these instructions for use are numbered 1, 2, 3, etc.

The components indicated in the figures are identified with letters A, B, C, and so on.

Reference to component C in figure 2 is indicated with the wording: "See fig. 2.C" or simply "(Fig. 2.C)".

The figures are given as a guide only. The actual pieces can differ from those illustrated in this document.

1.2.2 Titles

The manual is divided into chapters and paragraphs. The title of paragraph "2.1 Training" is a sub-title of "2. Safety regulations". References to titles or paragraphs are marked with the abbreviation chap. or par. and the relevant number. Example: "chap. 2" or "par. 2.1"

2. SAFETY REGULATIONS

2.1 TRAINING

 **Become acquainted with the controls and the proper use of the machine. Learn how to stop the motor quickly. Failure to follow the warnings and instructions may result in fire and/or serious injury.**

- Never allow children or persons unfamiliar with these instructions to use the machine. Local laws may establish a minimum age for users.
- Never use the machine if the user is tired or unwell, or has taken medicine, drugs, alcohol or any substances which may slow their reflexes and compromise his judgement.
- Do not allow children or other passengers to ride on the machine.
- Bear in mind that the operator or user is responsible for accidents or unexpected events occurring to other people or their property. It is the user's responsibility to assess the potential risk of the area where work is to be carried out and to take all the necessary precautions to ensure his own safety and that of others, particularly on slopes or rough, slippery and unstable ground.
- If the machine is sold or lent to others, make sure that the operator reads the user instructions contained in this manual.

2.2 PRELIMINARY PROCEDURES

Personal Protective Equipment (PPE)

- Always wear suitable work attire, hard-wearing safety footwear with non-slip soles and long trousers. Do not operate the machine barefoot or wearing open sandals. Wear hearing protection devices.
- Use of hearing protections can reduce the ability to hear any warnings (shouting or alarms). Be careful of what occurs around you in the work area.
- Wear protective gloves whenever your hands are at risk.
- Never wear scarves, shirts, necklaces, bracelets, loose flowing clothing, laces or ties or any hanging or flapping accessory that could catch in the machine or in any objects or materials in the work area.
- Tie your hair back if it is long.

Work area/Machine

- Thoroughly inspect the entire work area and remove anything that could be thrown by the machine or damage the cutting means/rotating units (stones, branches, iron wire, bones, etc.).

Internal combustion engine: fuel

 **DANGER!** The fuel is highly flammable.

- Keep the fuel in approved containers, in a safe place, away from any naked lights or heat sources.
- Keep the containers free of residues of grass, leaves or excessive grease.
- Keep the containers out of the reach of children.
- Do not smoke when filling up with fuel or when handling the fuel.
- Use a funnel to top up with fuel only in the open air.
- Do not inhale fuel fumes.
- Never remove the tank cap or add fuel while the engine is running or when the engine is hot.
- Open the fuel tank slowly to allow the pressure inside to decrease gradually.
- Do not approach the tank opening with a naked flame to check its contents.
- In case of fuel leakages, do not attempt to start the engine but move the machine away from the area of spillage and avoid creating any source of ignition until the fuel has evaporated and fuel vapours have dissipated.
- Immediately clean up all traces of fuel spilt on the machine or on the ground.

- Replace caps of all fuel tanks and containers securely.
- Never start the machine in the same place in which you refuelled it with fuel; the engine must be started in an area at least 3 metres from where you refuelled.
- Avoid getting any fuel or your clothing and, if this should happen, change your clothes before starting the engine.

2.3 DURING OPERATION

Work Area

- Do not operate the engine in confined spaces where dangerous carbon monoxide fumes can collect. The start-up operations must be carried out outdoors or in a well-ventilated area. Always remember that the exhaust gases are toxic.
- When starting up the machine, do not direct the silencer and therefore the exhaust fumes towards flammable materials.
- Do not use the machine in environments at risk of explosion, in the presence of flammable liquids, gas or powder. Power tools create sparks which may ignite the dust or fumes.
- Work only in daylight or with good artificial light in good visibility conditions.
- Keep persons, children and animals away from the working area. Children must be supervised by another adult.
- Avoid working with wet grass, in the rain and when there is a risk of a thunderstorm, especially lightning.
- Pay careful attention to uneven ground (hills, dips), slopes, hidden hazards and obstacles that could limit visibility.
- Be very careful near ravines, ditches or embankments. The machine could overturn if a wheel slides over the edge or if the earth gives way.
- Always mow across a slope and never up and down it, being very careful when changing direction, making sure you have firm footing and that the wheels do not hit any obstacles (such as stones, branches, roots, etc.) that may cause the machine to slide sideways or make you lose control of it.
- Look out for traffic when using the machine near the road.
- To avoid the risk of fire, do not leave the machine with the engine hot on leaves or dry grass or other flammable material.

Behaviour

- Exercise caution when reversing or moving backwards. Look behind you to make sure there are no obstacles before and during operations in reverse gear.
- Never run, always walk.
- Do not allow the lawnmower to pull you along.
- Always keep hands and feet away from the cutting means, when starting and when using the machine.
- Attention: the cutting means will continue to rotate for a few seconds after disengagement or after you have switched off the motor.
- Keep away from the discharge opening.
- Do not touch the parts of the engine that heat up during operation. Risk of burns.

⚠ If something breaks or an accident occurs during mowing, turn off the motor immediately and move the machine away to prevent further damage; if an accident occurs with injuries or third parties are injured, carry out the first aid measures most suitable for the situation immediately and contact the medical authorities for any necessary health care. Carefully remove any debris which could cause damage or injury to persons or animals if ignored.

Use limitations

- Never operate the machine with guards damaged, missing or incorrectly assembled (grass catcher, side discharge guards, rear discharge guards).
- Don't use the machine if the attachments/tools are not installed in their seats.

- Never disengage, deactivate, remove or tamper with the safety systems/micro switches installed.
- Do not change the engine adjustments, or exceed the maximum rpm. If the engine is forced to run at an excessive speed, the risk of personal injury increases.
- Do not strain the machine too much and do not use a small machine for heavy-duty work; if you use the right machine, you will reduce the risk of hazards and improve the quality of your work.

2.4 MAINTENANCE, STORAGE AND TRANSPORT

Ensure regular maintenance and correct storage to maintain machine safety and high performance levels.

Maintenance

- Never use the machine with worn or damaged parts. Faulty or worn-out parts must always be replaced and never repaired.
- To reduce the risk of fire, check for oil and/or fuel leaks on a regular basis.
- Be careful during adjustment of the machine to prevent entrapment of the fingers between moving parts of the cutting means and fixed parts of the machine.

⚠ The noise and vibration levels shown in these instructions are the maximum levels for use of the machine. The use of an unbalanced cutting element, the excessive speed of movement, or the absence of maintenance have a significant influence on noise emissions and vibrations. Consequently, it is necessary to take preventive steps to eliminate possible damage due to high levels of noise and stress from vibration; Maintain the machine well, wear ear protection devices, and take breaks while working.

Storage

- Do not store the machine with fuel in the tank in an area where fuel vapours could reach a naked light, a spark or a strong heat source.
- To reduce fire risks, do not leave containers with debris inside a room.

2.5 ENVIRONMENTAL PROTECTION

Safeguarding the environment must be a relevant and priority aspect of machine use, of benefit to the community and the environment we live in.

- Avoid being a disturbance to the neighbourhood. Use this machine at reasonable times of the day only (not early morning or late evening when the noise could cause disturbance).
- Comply with local regulations for the disposal of packaging, deteriorated parts or any elements with a strong environmental impact; this waste must not be disposed of with regular waste, but must be separated and taken to collection centres, who will recycle the materials.
- Comply with local regulations for the disposal of waste materials.
- When the machine is withdrawn from service, do not dispose of it in the environment, but take it to a waste disposal facility in accordance with the local regulations in force.

3. GETTING TO KNOW THE MACHINE

3.1 DESCRIPTION OF THE MACHINE AND PLANNED USE

This machine is pedestrian-controlled lawnmower.

The machine is essentially composed of a motor which drives a cutting means enclosed in a casing, equipped with wheels and a handle.

The operator is able to operate the machine and use the main controls, always staying behind the handle at a safe distance from the rotating cutting means.

If the operator leaves the machine, the motor and cutting means will stop within a few seconds.

Intended use

This machine is designed and built to cut (and collect) grass in gardens and grassy areas, with a height according to its cutting capacity, driven by an operator walking behind it.

Generally speaking this machine can:

1. Mow the grass and collect it in the grass catcher bag.
2. Mow the grass and discharge it on the ground through the rear part (if available).
3. Mow the grass and discharge it on the ground laterally (if available).
4. Mow the grass, chop it and discharge it on the ground (mulching effect - if available).

The use of special attachments provided for by the Manufacturer as original equipment or which may be purchased separately, allows this work to be done in various operating modes, illustrated in this manual or the instructions that accompany the single attachments.

3.1.1 Improper use

Any other usage, different than the afore-mentioned may be hazardous and harm persons and/or damage things.

Examples of improper use may include, but are not limited to:

- Allowing children, animals or other passengers on the machine as they could fall off and injure themselves or compromise safe driving by the operator;
- Letting oneself be transported by the machine;
- Using the machine to tow or push loads;
- Using the cutting means on surfaces other than grass;
- Using the machine for leaf or debris collection;
- Using the machine to trim hedges, or for cutting vegetation other than grass;
- using of the machine by more than one person.

IMPORTANT *Improper use of the machine will invalidate the warranty, relieve the Manufacturer from all liabilities, and the user will consequently be liable for all and any damage or injury to himself or others.*

3.1.2 User types

This machine is intended for use by consumers, i.e. non-professional operators.

It is intended for "DIY" use only.

IMPORTANT *The machine must be used by one operator.*

3.2 SAFETY SIGNS

The machine has various symbols on it (Fig.2.0). Their function is to remind the operator of the correct conduct for use, with due care and caution. Meanings of the symbols:

Warning. Read the instructions before operating the machine

Warning! Do not put hands or feet inside the compartment of the cutting means. Remove the spark plug cap and read the instructions before carrying out any maintenance or repair work.

Danger! Risk of thrown objects. Keep all persons away from the work area whilst working.

Danger! Danger of cutting. Cutting means in motion. Do not put hands or inside the housing of the cutting means.

Warning. When using the sharp cutting device. Do not put hands or feet near or under the opening of the cutting means. The cutting means continues to turn even after the motor has been switched off. Disconnect the plug from the mains before starting maintenance work or if the power cable is damaged.
(Only for electrical lawn mowers models)

Warning. Keep the power cable away from the cutting means.
(Only for electrical lawn mowers models)

IMPORTANT *Any damaged or illegible decals must be replaced. Order replacement decals from an Authorised Service Centre.*

3.3 IDENTIFICATION LABEL

The identification label holds the following data (Fig.1.0).

1. Sound power level.
2. Conformity marking.
3. Year of manufacture.
4. Type of machine.
5. Serial number.
6. Name and address of Manufacturer.
7. Article code.
8. Nominal power and maximum operating engine speed.
9. Machine mass with empty tank in kg.

Write the identification data of the machine in the specific space on the label on the back of the cover page.

IMPORTANT *Quote the information on the product identification label whenever you contact an Authorised Service Centre.*

3.4 MAIN COMPONENTS (Fig.1)

- A. Chassis.
- B. Engine.
- C. Cutting means.
- D. Rear discharge guard.
- E. Side discharge guard (if equipped).
- F. Side discharge chute (if equipped).
- G. Grass catcher.
- H. Handle.
- I. Engine brake lever / cutting means.
- J. Drive engagement lever.

⚠ *Strictly observe the indications and the safety regulations described in chap. 2..*

4. ASSEMBLY

Certain components of the machine are not installed in the factory and have to be assembled after unpacking, following the instructions below.

⚠ *Unpacking and completing the assembly should be done on a flat and stable surface, with enough space for moving the machine and its packaging.. Do not use the machine until all the instructions provided in the "ASSEMBLY" section have been carried out.*

4.1 UNPACKING (Fig.3.0)

1. Remove all the unassembled parts from the box.
2. Take out the machine and dispose of the box and packaging in compliance with local regulations.

4.2 HANDLE ASSEMBLY (Fig.4.)

4.3 GRASS CATCHER ASSEMBLY (Fig.5)

5. CONTROLS

5.1 MANUAL START HANDGRIP (Fig.6.A)

5.2 PUSH-BUTTON ELECTRIC START COMMAND (Fig.6.B)

5.3 ENGINE BRAKE LEVER / CUTTING MEANS (Fig.7.A)

OPC (Operator Presence Control) lever release: engine stop. (Fig.7.A)

5.4 DRIVE ON LEVER (Fig.7.B)

Transmission is active. (Fig.7.B)

IMPORTANT *The engine must be started only with the drive OFF.*

IMPORTANT *Avoid moving the machine backwards when the drive is ON.*

5.5 CONVERTER CONTROL LEVER (IF FITTED) (Fig.8)

In the models with drive systems, the converter control lever (if fitted) allows the operator to regulate forward gear speed. To do so, move the lever (1) following the indications provided near the control lever.

IMPORTANT *The engine must be running and the drive engaged when switching from one speed to another. Do not touch the converter control when the engine is stopped. Doing this could damage the converter.*

NOTE *If the machine does not move forward with the lever in the «» position, simply move the lever to «» and then immediately return to the «» position.*

IMPORTANT *The engine must be running and the drive engaged when switching from one speed to another. Do not touch the converter control when the engine is stopped. Doing this could damage the converter.*

5.6 CUTTING HEIGHT ADJUSTMENT

 **Do this when the cutting means is stationary.**
• Adjustment (See Fig.9.A)

6. USING THE MACHINE

IMPORTANT *For instructions on the engine and the battery (if equipped), refer to the corresponding manuals.*

6.1 PRELIMINARY PROCEDURES

Place the machine in a stable horizontal position on the ground.

6.1.1 Filling with oil and fuel

IMPORTANT *The machine is supplied without engine oil and without fuel.*

Before using the machine, refuel and top/up with oil; refer to the owner's manual of the engine at par. 7.2.1/7.2.2.

6.1.2 Preparing the machine before starting work

NOTE *This machine can be used to mow lawns in various ways;*

a. Preparation for grass cutting and collection in the grass catcher:

1. For side discharge models: make sure that the guard (Fig. 10.A) is lowered and locked by the safety lever (Fig. 10.B).
2. Insert the grass catcher (Fig.10.C).

b. Preparation for grass cutting and rear grass discharge on the ground:

1. Lift the rear discharge guard (Fig.11.A) and fit the pin (Fig.11.B).
 2. For models with side discharge: make sure that the guard (Fig. 11.C) is lowered and locked by the safety lever (Fig. 11.D).
- To remove the pin: see Fig.11.A/B.

c. Preparation for grass mowing and chopping (mulching function):

Lift the rear discharge guard (Fig.12.A) and fit the chute cap (Fig.12.B) in the discharge opening, keeping it slightly tilted to the right. Fasten it by fitting the two pins (Fig.12.B.1) into the holes provided until clicks into place.

For models with side discharge: make sure that the side discharge guard (Fig. 12.C/D) is lowered and locked by the safety lever (Fig. 12.D).

d. Preparation for grass cutting and side discharge on the ground:

1. Lift the rear discharge guard (Fig.13.A) and fit the chute cap (Fig.13.B) in the discharge opening, keeping it slightly tilted to the right. Fasten it by fitting the two pins (Fig.13.B.1) into the holes provided until clicks into place.
 2. Slightly push the safety lever (Fig.13.C) and lift the side discharge guard (Fig.13.D).
 3. Insert the side discharge chute (Fig.13.E).
 4. Close the side discharge guard (Fig.13.D) so as to lock the side discharge chute (Fig.13.E).
- To remove the side discharge chute:

5. Slightly push the safety lever (Fig.13.C) and lift the side discharge guard (Fig.13.D).
6. Release the side discharge chute (Fig.13.E).

6.1.3 Handle adjustment (Fig.14/15)

⚠ Do this when the cutting means is stationary.

6.2 SAFETY CHECKS

⚠ Always carry out the safety checks before use.

6.2.1 Safety check before every use

- Check the integrity and the correct mounting of all components of the machine;
- make sure that all fastening devices are correctly tightened;
- keep all surfaces of the machine clean and dry.

6.2.2 Machine operating test

Action	Result
<ol style="list-style-type: none"> 1. Start the machine (par. 6.3). 2. Release the engine brake lever / cutting means. 	<ol style="list-style-type: none"> 1. The cutting means should move. 2. The levers should return automatically and rapidly to the neutral position, the motor must switch off and the cutting means must stop within a few seconds.
<ol style="list-style-type: none"> 1. Start the machine (par. 6.3). 2. Operate the drive lever. 3. Disengage the drive lever. 	<ol style="list-style-type: none"> 2. The wheels should move the machine forward. 3. The wheels should stop and the machine stops moving forward.
Test driving	No abnormal vibrations. No abnormal sound.

⚠ If any of the results fail to match the indications provided in the tables, do not use the machine! Contact an Authorised Service Centre to have it checked and repaired if necessary.

6.3 START-UP

NOTE Start up the machine on a flat surface without obstacles or high grass.

6.3.1 Models with manual start handgrip (Fig.16.A/B)

NOTE The engine brake lever / cutting means must be kept pulled to prevent the engine stop.

6.3.2 Models with push-button electric start command (Fig.17.A/B/C/D/E)

- Insert the supplied battery in the relative engine compartment (Fig.17.A); (follow the instructions provided in the engine manual).
- An engine with non-removable built-in battery is included on some models (Fig.17.B).

NOTE The engine brake / cutting means lever must be kept pulled to prevent the engine stop.

6.4 OPERATION

IMPORTANT When working, always keep a safe distance from the cutting means, given by the length of the handle.

6.4.1 Grass cutting

1. Start moving forward and mowing the grass area.
2. Adjust the speed and cutting height (par. 5.6) in relation to lawn conditions (grass height, density and humidity) and the amount of grass to be cut.
3. It is recommended to always cut at the same height and in the two directions (Fig.19).

• For mulching or rear grass discharge:

- Never cut more than one third of the total grass height per single pass (Fig.18).
- Keep the chassis clean (par. 7.4.2).

• For side discharge: avoid discharging the cut grass from the side of the lawn yet to be mown.

6.4.2 Grass catcher emptying

• For grass catcher with contents indicator device:

 Lifted = empty.  Lowered = full*.

• that the grass catcher is full and must be emptied.

To remove and empty the grass catcher:

1. Wait until the cutting means stops (Fig.20.A);
2. remove the grass catcher (Fig.20.B/C/D).

6.5 STOP (Fig.21.A)

⚠ After having stopped the machine, it will take a few seconds for the cutting means to stop.

⚠ Do not touch the engine after stopping it. Risk of burns.

IMPORTANT Always stop the machine.

- When moving between work areas.
- When driving on grass free surfaces.
- Close to an obstacle.
- Before adjusting the cutting height.
- Any time the grass catcher is removed or refitted.
- Any time the side discharge chute (if available) is removed or refitted.

6.6 AFTER USE (Fig.22.A/B/C/D)

1. Clean (par. 7.4).
2. If necessary, replace damaged components and tighten any slack screws and bolts.

IMPORTANT Any time the machine is inactive or unattended:

- Remove the spark plug cap (for models with manual start handgrip)(Fig.22.B/C).
- Press the tab and remove the permission key (for models with push-button electric start) (Fig.22.D).

7. MAINTENANCE

7.1 GENERAL INFORMATION

△ *The safety regulations to follow are described in chap. 2. Strictly comply with these instructions to avoid serious risks or hazards:*

△ *Before commencing any inspections, cleaning or maintenance/adjustments on the machine:*

- **Stop the machine.**
- **Make sure that any moving component has stopped.**
- **Wait until the engine cools down.**
- **Remove the spark plug cap (Fig. 22.B).**
- **Remove the key (Fig.22.D) (for models with push-button electric start).**
- **Read the relevant instructions.**
- **Use suitable clothing, protective gloves and goggles.**

7.2 ROUTINE MAINTENANCE

- The frequency and types of maintenance are summarised in the "Maintenance Table" (chapter 10).

IMPORTANT *Any maintenance and adjustment operations not described in this manual must be carried out by your Authorised Service Centre.*

7.2.1 Refuelling

Place the machine in a stable horizontal position on the ground.

△ *Refuelling must be performed with the machine stopped and with the spark plug cap removed.*

Refuel according to the methods and cautionary measures indicated in the owner's manual of the engine.

IMPORTANT *Clean any trace of leaked fuel. The warranty does not cover damages caused by the fuel to the plastic parts.*

NOTE *Fuel is perishable and should not remain in the tank for more than 30 days.*

7.2.2 Check/top-up engine oil

Check/top-up the engine oil according to the methods and cautionary measures indicated in the owner's manual of the engine.

For a correct operation of the machine, regularly replace the engine oil, according to the indications in the owner's manual of the engine.

Make sure to have restored the oil level before using the machine again.

7.3 OCCASIONAL MAINTENANCE

7.3.1 Cutting means

△ *All operations concerning cutting means (disassembly, sharpening, balancing, repair, reassembly and / or replacement) must be performed at an Authorised Service Centre.*

△ *Make sure damaged, misshapen or worn cutting means are replaced, together with the securing screws to preserve balance.*

IMPORTANT *Always use original cutting means bearing the code indicated in the "Technical Data" table.*

7.4 CLEANING

Clean thoroughly following the instructions below every time it is used.

7.4.1 Cleaning the machine

- Always make sure the air intakes are free of debris.
- Do not use aggressive liquids to clean the chassis.
- To reduce the risk of fire, keep the engine free of grass, leaves residues or excessive grease.
- Clean the machine after each cutting work.

IMPORTANT *Never use high pressure water.*

Cleaning the cutting means assembly

- Remove grass debris and mud accumulated inside the chassis.

Models without washing connection

- To access the lower part, tilt the machine from the side indicated in the engine's manual, following the relative instructions, making sure that the machine is stable before carrying out any intervention.

- **For side discharge:** remove the discharge chute (if mounted - par. 6.1.2d.).

To wash the internal part of the cutting means assembly, proceed as follows (Fig.23.A/B/C):

1. always stay behind the handle of the lawn mower;
2. start the engine.

If the painting of the internal side of the chassis comes off, take immediate action, by retouching the painting with anti-rust paint.

7.4.2 Cleaning the grass catcher (Fig.24.A/B)

Clean the grass catcher and leave it to dry.

7.5 BATTERY

- The battery is supplied for the models with push-button electric start. For instructions regarding the battery life, recharging, storage and maintenance, follow the instructions in the instructions manual of the engine.

8. STORAGE(Fig.25)

When the machine is to be stored away:

1. Start the engine outdoors and leave it running at idle until it stops in order to consume all the fuel left in the carburettor;
2. clean the machine thoroughly (par. 7.4);
3. check the integrity of the machine;
4. store the machine:
 - in a dry place;
 - protected from inclement weather;
 - in a place out of children's reach;
 - making sure that keys or tools used for maintenance are removed.

9. HANDLING AND TRANSPORTATION

Whenever the machine is to be handled, raised, transported or tilted you must:

- Stop the machine (par.6.5) until the moving parts come to a complete halt.
- Remove the spark plug cap (Fig.22.B) or remove the key (Fig.22.D) or the battery (for models with push-button electric start command).
- Wear heavy work gloves.
- Hold the machine in the points offering a safe grip, taking into account the weight and its division.

- Use an appropriate number of people for the weight of the machine and the characteristics of the vehicle or the place where it must be placed or collected.
- Make sure that machine movements do not cause damage or injuries.

When transporting the machine on a vehicle or trailer, always:

- Use an access ramp of suitable strength, width and length.
- Load the machine with the motor switched off and pushed by an adequate number of people.
- Lower the cutting means assembly (par 5.6).
- Position it so that it cannot cause a hazard for anybody.
- Fasten firmly to the device of transport using ropes or chains to prevent it from tipping over causing damage and fuel leaks.

.....
 ⚠ **Do not transport machines that can be stored in vertically in such an upright position.**

10. MAINTENANCE TABLE

Intervention	Frequency	Notes
MACHINE		
Check all fasteners ; Safety checks/check controls (including the Operator Presence Control handlebar); Check the rear/lateral discharge guards; Check the grass catcher bag and lateral discharge chute; Check the cutting means.	Before use	par. 6.2.2
General cleaning and inspection; Checking for any damage to the machine. If necessary, contact the authorised service centre.	After each use	par. 7.4
Replacing the cutting means	-	par. 7.3.1 ***
ENGINE		
Checking/topping up fuel level; Check/top-up engine oil	Before use	par. 6.1.1 / 7.2.1 * / 7.2.2 *
Air filter check and cleaning; Spark plug contacts check and cleaning; Spark plug replacement; Charging the battery	*	* / par. 7.5 *

* Refer to the engine manual. *** Operation to be performed at the first signs of any malfunction

*** The operation must be carried out by your Dealer or a Authorised Service Centre

11. PROBLEM IDENTIFICATION

If problems persist after having performed the above operations, contact your dealer.

PROBLEM	PROBABLE CAUSE	SOLUTION
1. The engine does not start, does not keep running, operates irregularly or stops during operation	Incorrect starting procedure	Follow the instructions (see chap. 6.3).
	No oil or fuel in the engine.	Check the oil and fuel levels (see chap. 7.2.1 / 7.2.2).
	Dirty spark plug or incorrect electrode gap.	Check the spark plug (refer to the engine manual).
	Clogged air filter.	Clean and / or replace the filter (Refer to the engine manual).
	Carburation fault.	Contact your Authorised Service Centre
2. Engine flooding.	The manual start handgrip has been operated repeatedly with the starter engaged.	Refer to the engine manual.
	The manual start handgrip has been operated repeatedly with the spark plug cap removed.	Insert the spark plug cap and try to start the engine. (Refer to the engine manual).

3. The cut grass is no longer collected in the grass catcher.	The cutting means hit a foreign object.	Stop the engine and remove the spark plug cap. Check for any damage and contact an authorised service centre (section 7.3.1).
	The inner part of the chassis is soiled.	Clean the internal part of the chassis (par. 7.4.2).
4. Mowing is difficult.	The cutting means is not in good condition	Contact the Authorised Service Centre for the sharpening or replacement of the cutting means.
5. Excessive noise and/or vibration is experienced whilst working.	Damaged or loose parts The pin on the cutting means is out of its seat.	Stop the machine and disconnect the spark plug cable (Fig. 22.B). Check for any damage or loose parts. All checks, replacements or repairs should be carried out by your authorised service centre.
	Cutting means fittings are loose or the cutting means is damaged.	Stop the engine and remove the spark plug cap (Fig.22.B). Contact an authorised service centre (section 7.3.1).

12. ATTACHMENTS ON REQUEST

12.1 MULCHING KIT (Fig.26)

Finely chops the cut grass and leaves it on the lawn.
