1. GENERAL ASPECTS**1.1 HOW TO READ THE MANUAL**

NOTE or **IMPORTANT** *These give details or further information on what has already been said, and aim to prevent damage to the machine.*

The symbol  highlights danger. Failure to observe the warning can lead to the risk of injury to oneself and others and/or damage.

- The paragraphs highlighted in a square with
- grey spots indicate the optional characteristics
- not on all models documented in this manual.
- Check if the characteristic is on this model.

2. SAFETY REGULATIONS

 *This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instructions concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision.*

 *Keep these instructions for future reference! It is important to read and understand the instructions provided in this manual in order to avoid serious injuries, fire hazards, explosions and dangers from electric shocks and electric arcs:*

2.1 BATTERY

- a) Use power tools only with specifically designated battery pack. Use of any other battery packs may create a risk of injury or fire.
- b) Make sure that the machine is switched off before inserting the battery. Inserting a battery in a machine which is switched on can cause a fire.
- c) Always remove the battery pack before cleaning, inspecting or servicing the tool.
- d) Do not use a battery pack or tool that is damaged or modified. Damaged or modified batteries may exhibit unpredictable behaviour resulting in fire, explosion or risk of injury.
- e) Under abusive conditions, liquid may be ejected from battery.

 *Electrolytes released from battery pack chemical leakage are corrosive and toxic. Liquid ejected from the battery may cause irritation or burns. Do NOT allow chemical substances to come into contact with eyes, skin and, above all, do not ingest them. If chemicals in the battery come into contact with the eyes, wash them immediately with clean water for at least 15 minutes. Seek medical care immediately.*

If the outer seal breaks and chemicals in the battery come into contact with the skin: wash immediately with soap and water, neutralise with lemon juice, vinegar or other mild acids.

- f) Stop using the battery if it produces unusual smells, becomes hot or changes colour/shape and looks abnormal.

 *If the battery pack cracks or breaks, with or without chemical leakage, do not recharge or use it. DO NOT ATTEMPT TO REPAIR IT!*
In order to avoid accidents and risks of fire, explosion or electric shock and to prevent damage to the environment:
Cover the battery terminals with strong adhesive tape.

DO NOT attempt to remove or destroy any part of the battery pack.

DO NOT attempt to open the battery pack.

Dispose of and replace it with a new battery pack.

- g) When battery pack is not in use, keep it away from other metal objects, like paper clips, coins, keys, nails, screws or other small metal objects, that can make a connection from one terminal to another. Shorting the battery terminals together may cause burns or a fire.
- h) Do not expose the battery to fresh or salt water.
- i) Do not expose a battery pack or tool to fire or excessive temperature. Exposure to fire or temperature above 130 °C may cause explosion. Always keep it at a normal room temperature.
- j) The cells in the battery pack may leak if used too much or at extreme temperatures.
- k) Do not attempt to short-circuit the battery pack terminals. Do not switch the negative and positive battery terminals. Do not connect the positive and negative terminals of the battery to metal objects.
- l) When transporting accumulators, make sure the contacts never come into contact with each other and never use metal containers to transport them.
- m) Do not disassemble the battery.
- n) Do not hit, tap or stand on the battery.
- o) Never service damaged battery packs. Service of battery packs should only be performed by the manufacturer or authorized service providers.

2.2 ENVIRONMENTAL PROTECTION AND DISPOSAL

The following toxic and corrosive materials are found within the battery pack used with this tool: **Lithium-ion is a toxic material.**

 **All toxic materials should be disposed of properly to prevent environmental contamination.**

Before disposing of damaged or broken lithium-ion battery packs, contact your local waste disposal agency or the local Environmental Protection Agency for specific information and instructions.

Dispose of batteries in a certified lithium-ion recycling and/or disposal facility.

- Do not dispose of batteries with domestic waste.
- Do not burn.
- Do not place batteries where they could become part of a local waste landfill or municipal solid waste.
- Take them to an authorized recycling centre.

	At the end of their working life, dispose of batteries paying due attention to the environment. Batteries contain material classified as hazardous for you and the environment. They must be removed and disposed of separately at a facility that accepts lithium-ion batteries.
	Separate waste collection of the products and packaging used allows the materials to be recycled and reused. Reuse of recycled materials help to prevent environmental pollution and reduces the demand for raw materials.

3. SAFETY SIGNS

Various symbols appear on the battery and charger.

Meaning of the symbols:

	Read the instructions before charging.
	Do not expose the accumulator to sunlight when the temperature is higher than 45°C.
	Do not immerse the accumulator in water and do not expose it to humidity.
	Do not throw batteries into a fire. EXPLOSION HAZARD!
	At the end of their working life, dispose of batteries paying due attention to the environment.
	conformity marking
	Output polarity

IMPORTANT Any damaged or illegible decals must be replaced. Order replacement decals from an authorised service centre.

4. CHECKING OF BATTERY POWER RESERVE

Press the battery capacity indicator key (1). The lights (2) will turn on depending on the capacity level of the battery. See the diagram below:

Lights	Capacity
4 green lights	Battery is 75% - 100% charged
3 green lights	Battery is 50% - 75% charged
2 green lights	Battery is 25% - 50% charged
1 green light	Battery is 1% - 25% charged
1 green flashing light	The battery is flat and needs recharging immediately.

NOTE During use, the battery is protected against total drainage with a protective device that switches off the machine and stops it from working.

5. CLEANING

 **To avoid the risk of fire and electric shock do not use damp cloths or detergents on the battery.**

6. STORAGE

If the battery is not used for a long period of time, remove it from the charger.

If the battery is not charged for a long period of time, it must be kept in a cool, shaded place without humidity, with environmental temperature between 0~45°C.

IMPORTANT If unused for any length of time, recharge the battery every two months to prolong its working life.

7. ASSISTANCE AND REPAIRS

This manual provides all the necessary information to use the battery and for correct basic maintenance operations which can be performed by the user.

Any regulations and maintenance operations not described herein must be carried out by your Dealer or Authorised Service Centre, which have original spare parts and the necessary knowledge and equipment to ensure that the work is carried out correctly, maintaining the correct degree of safety and the original operating conditions of the machine.

Any operations performed in unauthorized centres or by unqualified persons will totally invalidate the Warranty and all obligations and responsibilities of the Manufacturer.

- Only authorized service workshops can carry out guaranteed repairs and maintenance.
- Genuine spare parts are supplied by authorised assistance workshops and dealers.
- Non-original parts and accessories are not approved; use of non-original spare parts and accessories will jeopardize the safety of the product and relieve the Manufacturer from all obligations or liabilities.
- It is suggested to bring the equipment once a year to an authorised service workshop for the maintenance, assistance and control of safety devices.

8. WARRANTY COVERAGE

The warranty conditions are intended for consumers only, i.e. non-professional operators.

The warranty covers all material quality and manufacturing defects recognised during the warranty period by your Dealer or Authorised Service Centre.

The warranty is restricted to the repair or replacement of components recognised as faulty.

The warranty only applies to machines subjected to regular maintenance.

The warranty does not cover damages resulting from:

- Failure to become familiar with the documentation accompanying the machine (Instruction manuals).
- Professional use
- Carelessness, negligence
- External causes (lightning, impact, presence of foreign bodies inside the machine) or incidents
- Incorrect use or assembly or prohibited by the manufacturer
- Poor and/or incorrect maintenance
- Modification to the battery
- Use of non-genuine spare parts (adaptable parts)

The warranty does not cover:

- The routine/extraordinary maintenance operations (described in the instruction manual)
- Normal wear and tear
- Deterioration in the appearance of the machine due to use

The user is protected by his or her own national legislation. The user's rights under the national laws or his or her own country are not in any way restricted by this warranty.
